

## What we'll do during the engagement

**Analyze** your priorities and requirements for deployment of Security Information and Event Management (SIEM) and eXtended Detection and Response (XDR) systems

**Define scope & deploy** Microsoft Sentinel and Microsoft 365 Defender in production environment, integrating them with Microsoft and 3rd party solutions

**Discover** threats to cloud and on-premises and across email, identity, endpoints and data and demonstrate how to automate responses

**Discover** and prioritize vulnerabilities and misconfigurations across your organization.

**Plan** next steps on how we can work together.
