

# NNIT's Remote Audit & Inspection Service

## Our value proposition

License to operate is maintained by audits and inspections. With NNIT's Remote Audit & Inspection Service, we enable organizations to audit and inspect production facilities with a proven and secure setup

No more red eye connections, sleepless nights in hotels or carbon emissions; distance and travel costs are removed as factors, and people can work seamlessly and effectively together in a mixed reality.

## What we offer

Rent a secure and fully managed Microsoft HoloLens for remote audits or inspections.

Through live video and audio feed organizations are able to conduct a thorough audit or inspections of their production facility by giving instructions verbally, written and by sharing documents live in the HoloLens.

Our part in this process is designing a solution at enterprise scale, covering the whole value chain from procurement, configuration, development to training and support.
