Azure Sentinel

- **Collect** data at cloud scale across all users, devices, applications, and infrastructure, both on-premises and in multiple clouds.

- **Detect** previously undetected threats, and minimize false positives using Microsoft's analytics and unparalleled threat intelligence.

- **Investigate** threats with artificial intelligence, and hunt for suspicious activities at scale, tapping into years of cyber security work at Microsoft.

- **Respond** to incidents rapidly with built-in orchestration and automation of common tasks.
