Managed Cloud Security Services Modules.

1 Incident Detection & Response

→ Solution for monitoring your environment seven days a week, 24 hours per day on-call

→ Reaction and Response to security incidents based on the service level.

→ Fine tuning/whitelisting to reduce false positives and alert fatigue.

2 Cloud Security Posture Management

→ Continuous semi-automated monitoring and compliance for your infrastructure and workloads.

→ From detection of misconfigurations to recommendations and remediation assistance.

3 Cloud Vulnerability Management

→ Comprehensive risk-based vulnerability management service to help you reduce vulnerabilities across the cloud workloads (VMs and containers).

→ Reduce time from discovery of vulnerability to mitigation
