

# Nortal Azure Architecture Review Service

The purpose of this Nortal facilitated assessment is to obtain understanding of the infrastructure and architecture of your Microsoft Azure cloud platform.

This discovery project covers all relevant areas in Azure architecture and based on review Nortal identifies improvements areas to continue your Cloud journey.

*2-4 weeks calendar time*

*Joint workshops with the Customer*

## Objectives

---

- Understand your current Azure architecture and future goals.
- Discover your Azure journey in different areas including
  - Azure Environments
  - Security & Networks
  - Storage & Databases
  - Monitoring & Logging
  - Compute & Containerization
  - Service interoperability and dependencies
  - Infrastructure automation
- Identify improvements areas to support next steps of your cloud journey.

## Deliverables

---

1. Azure Architecture assessment report
  - Current stage overview
  - Positive observations
  - Challenges & Concerns
2. Proposal for the next steps of your Cloud journey
