

Generative AI Guardian

Build Responsible AI on Azure OpenAI in 4-Weeks

Develop future-proof Generative AI confidently using responsible AI practices and avoid compliance issues. Neglecting Responsible AI practices can lead to costly rework. Nous' GenAI Guardian service enables swift development and deployment of responsible AI models on Azure OpenAI with its built-in responsible AI framework in 4 weeks. This service prioritizes responsible AI development by integrating fairness, explainability, and security principles from inception, with step-by-step guidance and continuous monitoring for improvement.

Benefits

- Reduced Risk of Rework
- Streamlined Compliance
- Increased Stakeholder Trust

Objectives

- Responsible AI Integration to assist in embedding fairness, explainability & security principles
- Utilize Azure Open AI features to counter bias, uphold data privacy & promote explainable models.
- Continuous Monitoring & Improvement to track model performance & identify areas for ongoing enhancements.

Deliverables

-  A Generative AI model developed with responsible AI implementation and its principles embedded throughout the process (Responsible AI Implementation).
-  A documented responsible AI development plan for future projects.
-  Access to ongoing support and guidance for responsible AI solutions and practices on Azure OpenAI (Responsible AI Solutions).
