Generative AI Launchpad
Fast Track to Generative AI Adoption in 6-Weeks

Empower businesses with the transformational capabilities of Generative AI adoption. This exclusive 6-week program helps explore, develop, and pilot a high-impact Generative AI use case tailored to the specific needs. The team of experts, with experience in responsible AI development, will work alongside every step of the way, from initial ideation to pilot program launch. Leverage the power of Azure OpenAI services for a seamless and rapid generative AI adoption process.

Objectives

- Analyze business goals, data and Azure environment.

- Collaborate on Generative AI ideation and PoC strategy.

- Develop Generative AI PoC using Azure Open AI & integrate with existing systems.

- Launch & monitor pilot program performance.

- Design pilot program with training & monitoring procedures

- Test & evaluate PoC for scalability.

Deliverables

- A functional Generative AI proof-of-concept (PoC) aligned with the chosen use case.

- A pilot program plan for wider enterprise adoption.

- Invaluable insights and data to inform future Generative AI investments.

- Access to ongoing support and expertise from Nous' Generative AI specialists.
