NOUS INTELLIGENT TESTCOMPLETE ACCELERATOR 2-WEEK PROOF OF CONCEPT (POC)

Seamlessly transition from web to mobile test automation with the Nous Intelligent TestComplete Accelerator. Powered by Azure OpenAI, this solution simplifies the complex migration of Name Mapping files for SmartBear TestComplete, enabling faster, more accurate mobile testing on SmartBear BitBar.

What's Included in the 2-Week Engagement Roadmap

Week 1	Week 2
Initial Setup & Test Migration	**Optimization & Roadmap Finalization**
■ Configure TestComplete for BitBar.	■ Analyze and identify test execution gaps (if any).
■ Integrate mobile application into TestComplete.	■ Document manual intervention requirements (if necessary).
■ Perform test script migration.	■ Consolidate test execution results.
■ Generate Name Mapping file using the Nous Accelerator.	■ Provide a comprehensive roadmap for full-scale migration.
■ Execute initial test validation on SmartBear BitBar.	

Nous' 2-week PoC helps QA teams

Migrate Name Mapping from web to mobile with 5X speed.

Enhance object identification accuracy using AI-driven test automation.

Reduce manual effort, cutting operational costs.

Ensure compatibility and smooth integration with SmartBear BitBar.
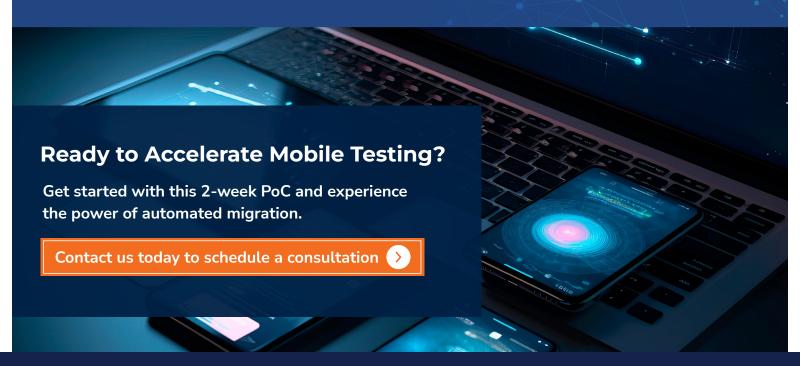

Why Choose Nous?

Proven expertise in test automation & AI

Microsoft & SmartBear strategic partner

AI-optimized migration with measurable ROI

Deep BitBar integration experience

Ready to Accelerate Mobile Testing?

Get started with this 2-week PoC and experience the power of automated migration.
