

Monitoring, alerting & response
built on decades of **cybersecurity expertise**,
wielded by **global SOC analysts**.

Packaged Managed Security. Finally available.

Managed Security can no longer be a luxury in today's escalating threat landscape. **novaSOC** combines automatic monitoring & alerting with expert response from our global team of SOC analysts—bringing **decades of cybersecurity expertise & world-class threat intelligence** within reach.

Core Features

- **Endpoint Monitoring** scans local logs (including Windows & OSX, process-related information & endpoint network activity) then runs analysis of known/unknown binaries, executables & endpoint vulnerabilities (Applications & OS).
- **Threat Hunting**, carried out by skilled analysts with decades of cybersecurity experience, spots & isolates indicators of compromise.
- **Automated Incident Reporting** instantly uploads logs to the cloud, enabling fast remediation supported by our SOC analysts.
- **Guided Remediation** covers gaps in your team's bandwidth or security experience while **Detailed Analytics** fuel incident reports, identify weaknesses & power a detailed case-management system while improving response times & workflow from **an in-portal multi-tenant dashboard**.

Efficient Integration

- **Easy, Automated Deployment.** **novaSOC** gets running easily with a single agent on all endpoints via an automated process (MSI or pkg).
- **Non-invasive.** **novaSOC** uses a background process, easy to integrate into existing services.
- **Secure Access Provided.** Our MFA-enabled management portal controls access via SSO.

Differentiators

- **100% of Files & Traffic** inspected
- **Month-to-Month** pricing
- **Single Portal** for viewing **All Alerts & Data**
- **Full Ticketing Integration** with leading PSA tools
- **Mapped to the MITRE ATT&CK Framework & Threat Intelligence**
- **24/7 Monitoring** by Security Analysts in four global 24/7 SOC's

novacoast

For 20 years, Novacoast has strengthened cybersecurity postures & resilience with advisory, engineering, development, IR & managed services. Our global reach provides the expertise & infrastructure to make elite cybersecurity available to all.

novaSOC is more comprehensive,
more powerful & better supported.
