How can I fix a leaky toilet?

AI Advisor
There are several ways to fix a leaky toilet, depending on the source of the leak. Some common solutions involve repairing the flush valve, replacing the flapper, or using a toilet repair kit.

1. Flush Valve Repair:
You can use the Fluidmaster Universal Flush Valve Repair Kit with Tool to repair leaks between the tank and bowl. The kit fits most common 3" flush valves and is designed for high efficiency toilets (HET) with a 3-inch flush valve. It includes an adjustable flush valve, a 3" flapper, a gasket, a toilet tool, bolts, washers, and nuts. Order URL for this kit: [Click Here] [doc5]

2. Flapper Replacement:
