# Novata Carbon Navigator

The Novata Carbon Navigator is an easy and affordable solution to calculate your carbon footprint, manage GHG data, and set actionable climate targets. Purpose-built to meet assurance and regulatory requirements, with guidance and support offered throughout for a quick time-to-value.

## Accurately Calculate Your Carbon Footprint

- **Streamline tracking** energy consumption, spend, travel, waste, and commuting
- Import electricity, water, and gas consumption with **API integration**
- use **Novata AI Assist** to extract and parse data from utility bills and documents
- **Easily upload** company expenses and automate vendor categorization
- **Ingest and categorize expenses** from your business systems
- **Confidently report data**, backed with an investor-grade audit trail

## Differentiators

**MARKET EXPERTISE**
*Novata partners with over 1000 companies to track carbon emissions with our tools*

**STREAMLINED DATA COLLECTION**
*Data validation & guardrails, automated portco, fund, and portfolio level aggregation*

**ADVISORY EXPERTISE**
*Team of in-house experts ensure Novata and its clients are at the forefront of best practice, regulation, and metric guidance.*

**TARGET SETTING**
*Understand current performance with a baseline assessment, then set targets for incremental improvement*

**TIME TO VALUE**
*Flexible carbon tools to match your needs with average reporting time of 2 hours*

**DATA INTEGRATIONS**
*Integrations with Netsuite, Sage, Quickbooks, Microsoft and many other providers*
