novisto

The next generation ESG
data management
& analytics platform

Own your ESG narrative

Companies are subject to an increasing set of non-financial reporting requirements relating to environmental, social and governance (ESG) factors, fuelled by investor appetite and increased regulation. As a consequence, these corporations need to take action now to assess ESG risks, identify opportunities for value creation, and better understand disclosure requirements.

Novisto is a scalable SaaS platform that streamlines and simplifies the ESG data collection process with a suite of APIs and dynamically maps this data to major reporting frameworks. With Novisto's innovative approach, companies can better manage ESG related risks, create value from their non-financial data, and stay in control of their ESG narrative.
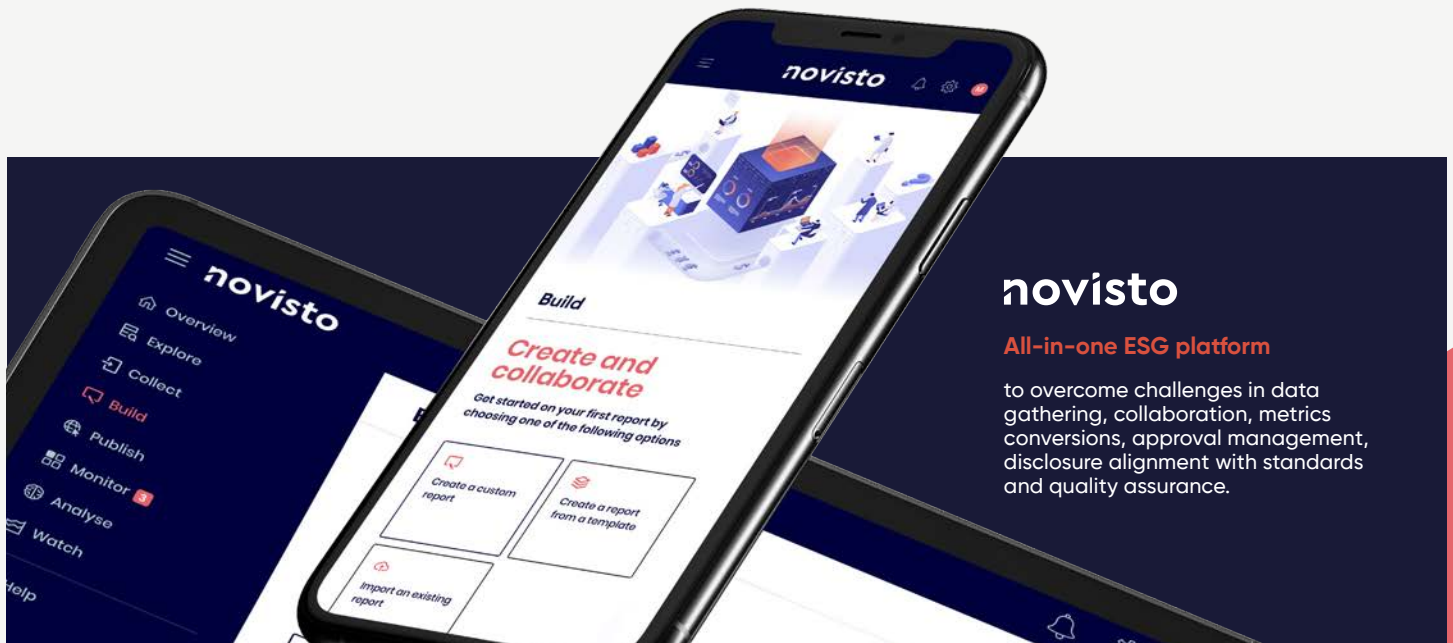

Data Quality First

Novisto is the only solution that integrates quality controls and auditability throughout the platform, in addition to incorporating external data to help you keep pace with evolving reporting standards and enrich your companies' ESG understanding.

ESG Management Beyond Disclosures

With Novisto's state of the art ESG data explorer, you can index and classify your internal Corporate Social Responsibility (CSR) data, policies and reports and build a unified view of your organization's commitments.

Business Insights

Novisto's AI-driven analytics and business intelligence modules will create value from non-financial data, facilitate benchmarking vs. peers, improve CSR performance monitoring and optimize ESG disclosure impact.
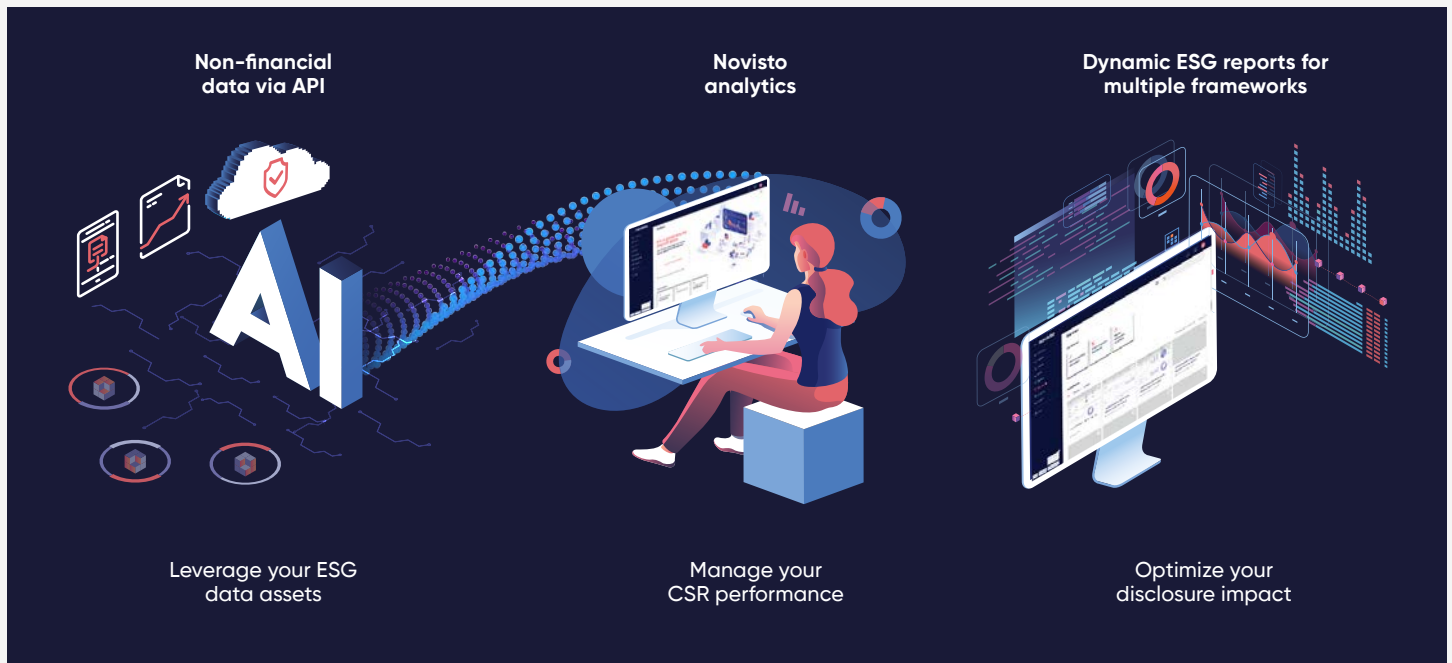

novisto

All-in-one ESG platform

to overcome challenges in data gathering, collaboration, metrics conversions, approval management, disclosure alignment with standards and quality assurance.
