AZURE VMWARE SOLUTION

# Run your VMware workloads on Azure

USE CASE: Azure VMware Solution is built on VMware Cloud Foundation - a comprehensive offering of software defined compute, storage, networking and management – deployed in Azure along with an integrated set of Azure services. Customers can capitalize on their existing VMware skills and tools while leveraging the global Microsoft Azure infrastructure.

Client Outcome

Azure VMware Solution enables a fast path to the cloud, seamlessly migrating or extending existing VMware workloads from on-premises environments to Azure without the cost, effort or risk of re-architecting applications or retooling operations. Build, run, manage, and secure applications across VMware environments and Microsoft Azure while leveraging familiar and established VMware tools, skills and processes.

Seamless integration with Azure services provides the opportunity to continue to build cloud competencies and modernize over time. Maintain native VMware tools and management experiences you are familiar with, and incrementally leverage Azure capabilities as required.

Solution/Joint Offering

Solution Assessment			
Assess VMware environment using Sizer	Identify workloads to migrate	Define migration approach HCX (Live, Bolk, Cold)	Identify steps to full production

Testing and Validation
Initial workloads Production Jumpstart or Proof-of-Concept (PoC)
Create Privat Cloud, Move few VM's using prefered migration type

Transition to Production
At-scale migration & adoption
Leverage Microsoft FastTrack, supported from NTT

Solution in Detail

Azure VMware Solution is an Azure service to redeploy and extend your VMware-based enterprise workloads to Azure. We provide the management systems, networking services, operating platform and backend infrastructure operations required to run native VMware environments at scale in Azure. Innovate with Azure's capabilities, scale and economics. Reuse your existing VMware tools and skills to manage your workloads on Azure without disrupting any network, security or data protection policies. Focus on creating business value while we help you reduce costs.

We offer node configurations based on core, memory and storage requirements. You can choose the type of node that best fits your needs. You can take advantage of Reserved Instance purchase option for one or three years for price predictability.

Why NTT Ltd.?

Holistic Managed Services

We provide solutions to address every facet of your IT landscape.

Global reach, local presence

Consistent processes and integration around the globe to ensure uninterrupted service delivery. A truly global service 1 SLA, 1 contract

Customer centricity

Your business is at the heart of our services and solutions, optimizing customer experience and business outcomes.

Extensive track record

Industry leading customer support, mature methodologies and technology leadership.
