

Teams for Communication

Migrate to modern productivity platforms

Seamless video and voice communication is everywhere – agile working methods allow companies to react flexibly to external influences. Video supports you in the decision making process as well as in the exchange of expertise. Video conferences are no longer only used by executive boards and top management. Teams enable everyone.

What is Teams for Communication

With a Microsoft Team architecture, there are different options for using video and telephony seamlessly and device independent for your company. NTT provides you with a variety of ways to match your business requirements for video and voice infrastructures with Microsoft Teams. We accompany you and your users in the planning, changing and adoption process for Microsoft Teams – by enabling your organization for video and voice communication with more employees onboard. Regardless of the client endpoint everyone will enjoy a rich meeting experience and thereby also reduce travelling for meetings.

Why customers migrate to Microsoft Teams with NTT

- System administration technology and services
- Operational and administrative reporting
- Business and technical usage review with innovation recommendations
- Global reach for your Microsoft Teams video and telephony infrastructure

Scalability

We are able to scale to your business needs, ensuring a consistent client experience, ramping up or down as required. This also allows flexible billing to suit your company through any changes it may encounter.

Security and Compliance

Teams brings together the modern and familiar experience of voice, telephony, video and collaboration with the security, compliance, and control that users have come to expect from Microsoft. With built-in encryption enabled by default, Microsoft offers end-to-end security and compliance

Designed for your needs

Deployment planning services for the Teams solution architecture design, integration, and migration planning services

'Previously if a group moved [overseas] because it wanted to be an environment of working with other scientists you'd lose that link; now it allows them to extend their collaborations to be involved in wider scientific effort and where scientists can be sure that there's a security of their data.'

Stephen Hollings, Chief Executive Officer, The Heart Research Institute

How Teams for Communication Services works to achieve business benefits

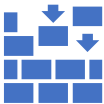

Increase Employee Productivity

Companies can gain up to 240 hours per year from employees – thanks to mobile working. That's equivalent of USD 5,114 extra work – or six additional working weeks per employee

Joint Solution

Our 500+ Skype for Business projects globally, and 2 million successfully deployed seats of Microsoft® Lync and Skype for Business, make us the perfect partner. We offer you a range of consulting, support, and managed services that align to the Skype Operations Framework

The desire to improve efficiencies, reduce operational costs, engage employees, and promote greater communication and collaboration to both internal teams and the supply chain, is top of mind for today's enterprises. Organisations need to differentiate by attracting and retaining the best staff and accelerating their journey to workspaces for tomorrow

Our promise to you

Our productivity solutions are underpinned by our highly regarded consulting engagements and an end-to-end portfolio of services to enhance your digital journey

We have more than 20 years of Voice experience with leading IP telephony providers. This allows us to manage the co-existence and operational complexity of transitioning to Skype for Business, so reducing the risk of change to your organisation.

Having deployed millions of Skype for Business and Lync Enterprise Voice seats around the world, as well as proactively managing hundreds of thousands more, NTT is the expert you can rely on – this is the expertise we bring to the table in your Teams engagements

Tangible Benefits

A new era for intelligent communications - Collaboration relies on frequent, clear and constructive communication. With this in mind, Microsoft Teams unlock your organization for intelligent communications - integrating Skype for Business Online with its communication focus, into the more collaboration centric Microsoft Teams. We help you run an integrated, agile business and provide you with a clear journey to modern enterprise, social and team collaboration.

Why NTT

We are a global partner of Microsoft - we make connection count. We start by helping you assess your needs and develop a roadmap that best suits your business strategy. Then we plan, deploy, and proactively manage your social and team collaboration solutions, taking into consideration security and compliance. Offering you flexible services that can grow and change with you, we support applications such as the O365 collaboration suite, including Microsoft Teams, SharePoint, Yammer, and Skype for Business.
