

Consulting Services

# Hybrid Workplace Collaboration Services

Collaboration is a crucial enabler of the digital business; improving business processes, driving employee productivity, and reducing time to market for new products & services.

## Hybrid Workplace

The way people work has changed and needs to match the style and environment that works best for individuals and teams.

Our services look at the environment, the people and culture, and the technology that underpins the workplace.

Increasingly Smart Spaces incorporate IoT and data analytics to understand and improve how teams work together and with their environment.

## Our Service Portfolio

M365  
activation  
and

Teams  
activation,  
adoption &  
management

Workplace  
analytics

OneDrive  
and  
SharePoint  
integration

Modern  
Device  
Management

**Empowering employees by enhancing the workplace experience and enabling new modern workstyles.**

## Communication and Collaboration

Businesses are increasingly digital and agile, but still cater to the different ways in which people work.

Finding colleagues, expertise, connecting and communicating, sharing ideas and building people networks is the engine of this new way of working.

We utilise Office 365 with Teams, Yammer, and OneDrive to support effective communication and collaboration

## A workplace environment rich with access to apps and Data

The world is full of apps and data and making sure platforms, location and connectivity don't get in the way of access to corporate apps is sometimes a challenge.

We provide a range of services to identify which apps are being used and by whom, services to replatform and package apps and services to deliver mobile and desktop apps to the appropriate device whether it be a Windows desktop, a Mac or an Android or iOS device.

# The Hybrid Workplace: how it can transform a business

Enterprises need a hybrid workplace strategy. It should be comprehensive, embracing practices such as activity based working and utilising technologies and tools that let employees collaborate and work effectively both inside and outside of the office environment.

## The trends that are driving the workplace evolution

Flexible workstyles are here to stay with 75% of employees saying they want flexible work Options

## Drivers for new collaboration solutions

Enterprises can bring efficiencies by helping people work more collaboratively and see the adoption of new workstyles as something that will benefit the business – a flexible workforce will use time more productively, will work collaboratively and will be more satisfied due to greater flexibility

The bottom line is to enable your employees to get on with what they need to do, regardless of the devices and technologies they choose. NTT can help you get all of the groundwork done in relation to getting the right policies and structures in place, businesses will be able to apply bring your own device to a greater degree, even with new technologies entering workspaces for tomorrow.

## Collaboration Services

NTT's Collaboration solutions and services includes a workplace assessment that looks at people, environment and technology and determines an optimal activation path to enable effective employees. Services to migrate and activate various components of O365, Azure based Identity, collaboration services supported by Teams, and effective ways to share and publish data with OneDrive and SharePoint.
