# Cybersecurity Advisory
## Baseline Module

**This outcome-driven engagement** identifies gaps in your information security management policies, standards, processes and technologies that pose a risk to your organization's security posture and provide a recommendation and prioritized roadmap for improvement.

**Security boundaries have moved; no longer can you rely solely on traditional network security controls to provide adequate protection for your most valuable business assets. Threats continue to evolve rapidly, and your IT landscape changes driven by new business demands that include more mobile access, more web-based applications, and hybrid IT environments. You need to think strategically about planning, designing and operating your enterprise security.**

A review of the current state of your security posture is required as part of your ongoing security improvement initiatives. A robust security roadmap includes the unified and integrated design, implementation, and operation of security practices across your organization. This will enable you to formulate a plan to manage risks, maintain compliance with external regulations and contractual mandates, and align to industry best practice.

Our Cybersecurity Advisory service is a business-outcome-driven consulting engagement with a flexible, modular framework that spans the entire lifecycle of security from developing a strategy and plan aligned to your business needs, optimizing existing security controls, to designing your next-generation enterprise security architecture, policies and framework. Insight gained from optional assessments allow you to apply your resources and controls in the most effective way to protect key assets.

'The current explosion in the number of vulnerabilities has **only served to increase complexity** as organizations strive to keep up with patches and migrating controls on a weekly and daily basis.'
Executive Summary -
2019 Global Threat Intelligence Report

## Key service features:

- Provides a comprehensive baseline review of the people, process and technology aspects of your information security and identifies any gaps
- Provides a prioritized, actionable security roadmap that is business aligned

## How we deliver

The Cybersecurity Advisory is delivered in a flexible way, allowing the engagement to be customized based upon the level of detail required.

Our Baseline Module focuses on workshops and interviews to analyse the maturity levels of your security policies, standards, processes and controls across all areas of information security.

Our consultants work with your stakeholders to determine the gaps between your security posture today, where you want to be in the future and how your organization bridges the gap to meet those future requirements. We then benchmark you against other clients in your industry and region and develop a highly-tailored recommended actionable roadmap for areas that need to be improved.

The recommended roadmap can be used to build a budget and resource plan, or simply aligned to an existing strategy for confirmation and reassurance.

## Business outcomes

| Business outcome | Solution/services benefit |
|---|---|
| Identification of gaps in your information security management policies, standards, processes and technologies. | Reduction in security risk, achievement your governance, risk and regulatory compliance requirements and enablement of an effective Managed Security Service. |
| Prioritized roadmap and implementation recommendations. | Improvement in security posture across your ICT landscape for current and future architectures. |

## Why NTT?

### Global experience
More than 15,000 security engagements with clients spanning 49 countries across multiple industries.

### Track record
Decades of experience in providing professional, support, managed and fully-outsourced security services to over 6,000 clients.

### Expert skills
Highly certified security consultants with expertise across various infrastructures, systems and application technologies.

### Proven approach
Client-centric, pragmatic approach using proven assessments, methodologies, frameworks and best practices to deliver consistent, high-quality engagements.
