

**Are you a Microsoft Teams Contact Center, AI Developer, or looking to ingest large quantities of Microsoft Teams communication data in stereo...**

Numonix's Microsoft Teams Recording as a Service (TRaaS) is designed for developers, integrators or large organizations seeking a robust and easy-to-use cloud-native recording solution.

With Numonix TRaaS, you can effortlessly hook into Microsoft Teams and access high-quality media in a centralized cloud-native solution.

BENEFITS

### Simplified Integration

Built to meet the needs of AI-focused companies and developers, TRaaS allows integration of Teams recordings into your existing AI tools and workflows.

### Rapid Deployment & Update

Get up and running in a matter of minutes with our quick deployment process, saving you valuable time and effort.

### Compliance Ready

Ensure your recordings meet regulatory requirements without the complexities associated with certification and maintenance.

### Flexible Billing

Eliminates rigid per-user subscriptions. Our consumption-based billing models allow you to pay as you go, maximizing cost-effectiveness.

### Direct APIs for Enhanced Control

Gain direct access to private bot metrics, logs, and monitoring capabilities. Leverage the power of our APIs to customize your recording workflows. Effortlessly retrieve metrics, logs, and real-time monitoring data, enabling you to stay informed and in control.

### Feature Rich Capabilities

Record on Demand and enable PCI muting in a private bot environment. Extract recorded calls and store them in your preferred storage accounts. Supports custom recording rules like PTSN only, meetings, only, meeting subject, call queue, and more...

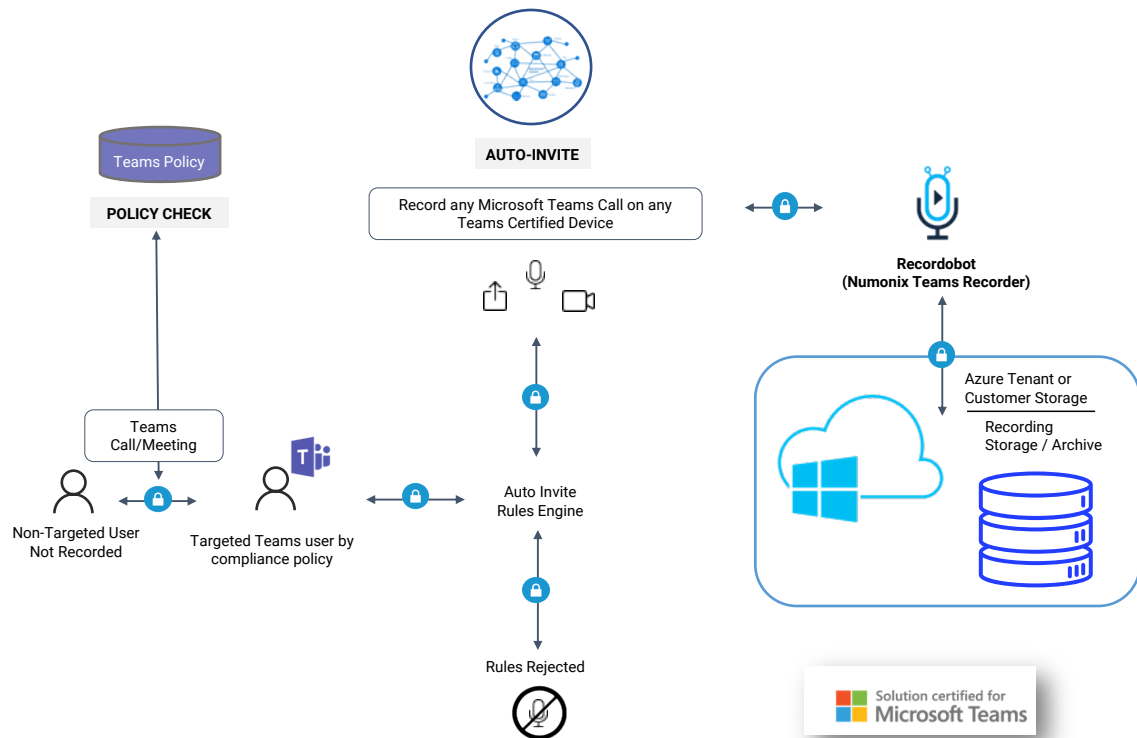

Numonix is an interaction capture company that innovates solutions for recording, analyzing, and managing customer interactions across various communication channels. With solutions designed to help organizations enhance customer experiences and ensure regulatory compliance. We drive revenue growth by providing valuable insights into customer interactions. Numonix serves businesses of all sizes across various industries, including healthcare, finance, retail, and more.

## Architecture and Technical Features

Powerful architecture allows you to utilize underlying capture data, eliminating the complexities of certification, maintenance, and support. You can focus on leveraging the captured data to fuel your business intelligence.

Choose between a hosted and managed environment or deploy and store your recordings in Azure BLOB storage or S3 buckets, giving you the flexibility to store and utilize the data wherever you require, ensuring maximum flexibility and control.

Leave the certification, maintenance, and support to us. Our solution is certified and compatible with Microsoft Teams, ensuring compliance and reliability. Numonix's TRaaS solution is fully managed, freeing you from technical burdens and enabling you to focus on what matters most.

## Experience the future of Microsoft Teams recording with Numonix's TRaaS

Contact us today to discuss your unique requirements and unlock the full potential of your Teams communications.
