The team

Nunsys currently employs more than 520 professionals, mostly computer and telecommunications engineers, with extensive experience in the ICT sector, and serves more than 3.000 customers in Spain. Our customer orientation, reliability, trust, professionalism and teamwork are a guarantee of success.

Nunsys is divided into different areas: People and Talent, Administration, Software, Systems, Networks and Communications, Marketing and Communication, Audiovisuals, Industry 4.0, Digital Transformation, Learning, and Computer Security and ICT Governance. Recruitment and recruitment of talent is constantly growing. **Nunsys** has a continuous recruitment pool of IT engineers mainly.

Nunsys History

In 2008 BPLAN Soluciones was established and begins the activity. From this event, **Nunsys** has grown exponentially with a business model based in organic and inorganic growth. Our headquarters are located in the Paterna Technology Park, which is one of the main business and research Hubs of Technological Institutes and R&D, development and IT companies.

The ERP area – Dynamics Section

The best of both worlds
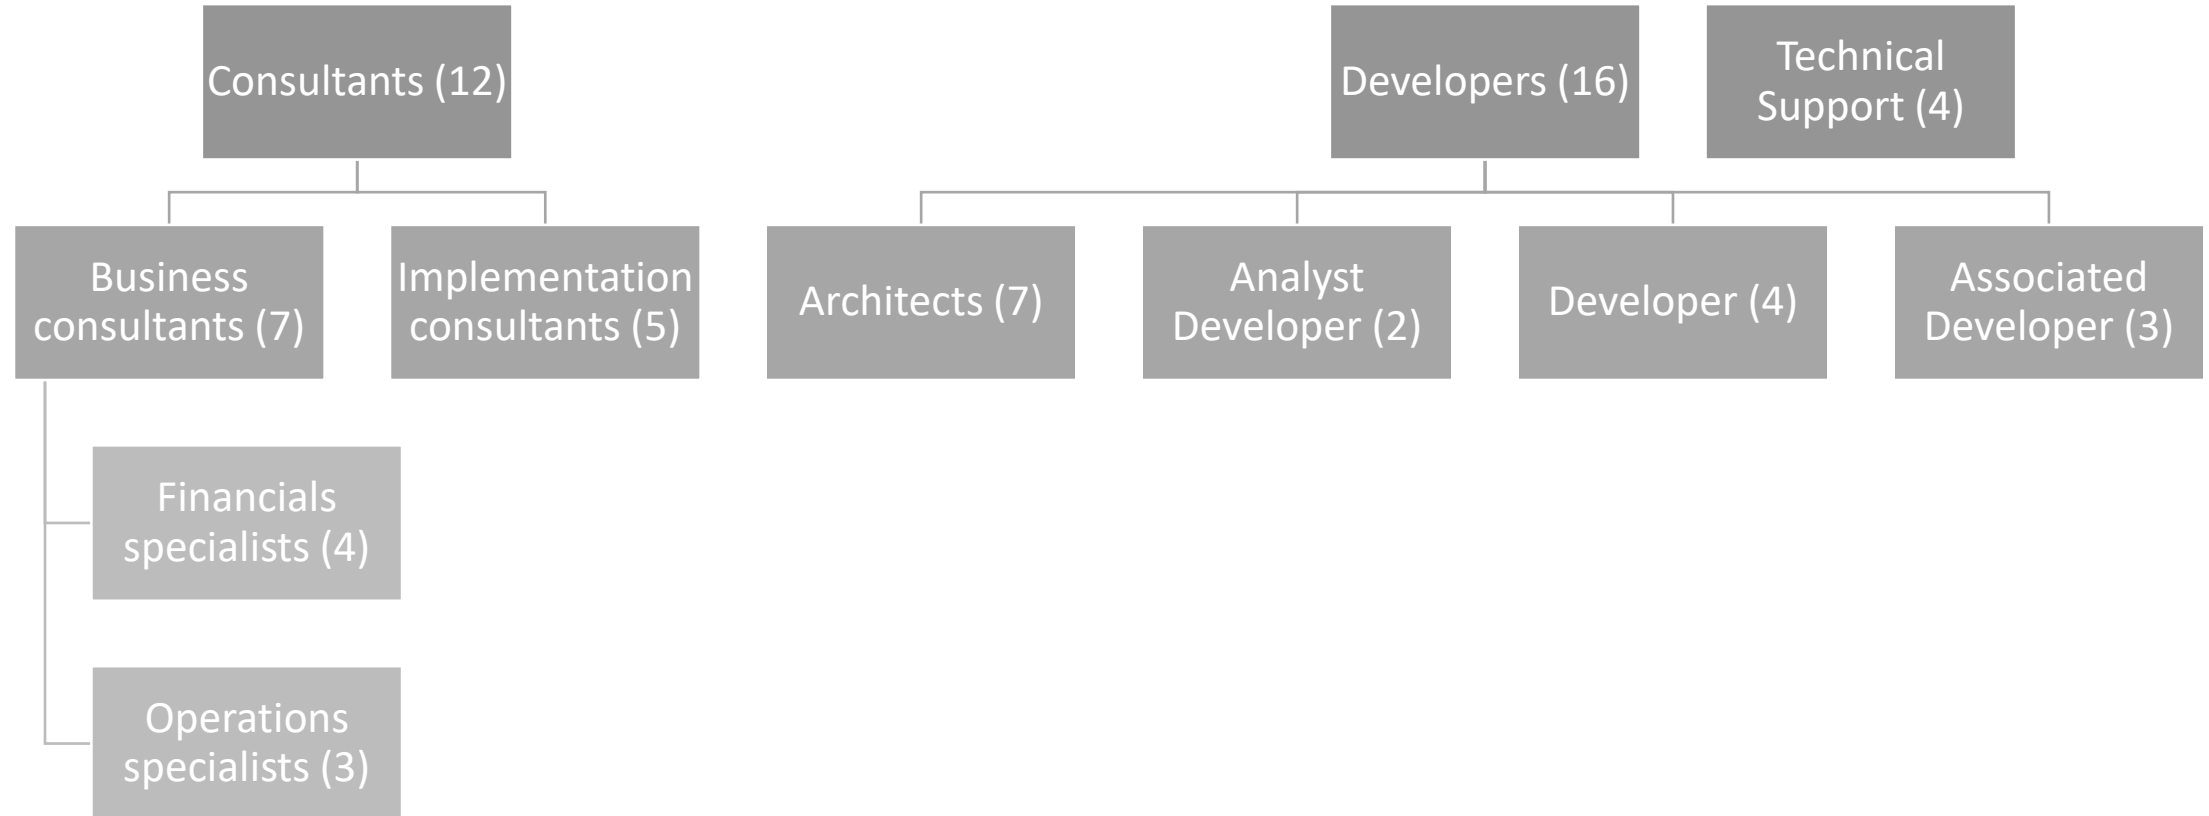

We are both an experienced VAR and also an ISV with our own IP for Dynamics NAV and Dynamics 365 Business Central.

1º VAR

As a VAR, we have a team of specialists that help companies get the most of their Dynamics implementation. We work closely with other teams in Nunsys, like the CRM team and the Analytics team, and also with some of the best ISV Partners to provide the best solution to our customers.

2º ISV

We have developed our own IP and are working proactively to get the most of our knowledge to AppSource in order to deliver the best quality in our products.

Nunsys Apps for BC

ADVANCED VAT + SII

App for the management of the company's Immediate Information Supply (SII) to the AEAT and advanced VAT functionality.

CASH FLOW

App used to make cash flow forecasts by bank account in a very agile way (free of charge)

PAYROLL IMPORT

App for importing employee payrolls from an Excel file and generating the corresponding accounting entries.

IRPF

App to manage the IRPF tax in purchase documents. Generation of 111, 115 and 190 reports for the spanish authorities.

Confirming

App that generates standard confirming files, of free and voluntary use, simplifying the management of payments between the company and banks.

WMS

Mobility application for PDAs that allows you to carry out capacity, resource and component consumption and goods issues.

Other ISV Partners with whom we work closely

As a Continia Partner, we implement their module of Document Capture, both in SaaS and on premise.

We used to have our own EDI solution, but with the transition to SaaS decided to look for an expert that had an already built one. We implement Anveo EDI Connect for our SaaS customers.

We deploy some of the extensions of Insight Works, like PrintNode Connector for cloud printing, and Product Configurator for manufacturing companies.

Our Implementations

Since 2019 we have been really focused on Business Central deployments, with special interest in SaaS ones.

We have 43 satisfied customers in versions of Business Central with their implementation completed or in advanced stages of the project. These customers are both new installations and migrations from previous versions of NAV.

Out of these 43 implementations, a 16% are on premise ones, and the rest are on SaaS.
