

NuOCR

Techno-Functional

NuOCR is a Microsoft Azure Marketplace scan-to-database product developed by Nuvento. It is an end-to-end solution that automates data extraction from paper and allows you to export or save the data to a datastore of choice, converting unstructured data into a structured format.

The paper-to-digital optical character recognition (OCR) solution extracts information from files like images, pdf documents, forms, surveys or invoices, validates it and classifies it in the company's database or excel sheet. This functionality makes it ideal for organizations that need to digitize in a go heavy loads of paper data, such as images, pdf documents, paper forms, surveys or invoices, and extract data points from them, making them verifiable and editable. The data can then be saved to database or exported as a csv or excel file.

Industries that spend a lot of time and money on manual data entry can now use NuOCR to simplify this process and realize cost savings.

Why use NuOCR

-  **Faster Documentation**
-  **Data Accuracy**
-  **Cost Reduction**
-  **Easy to edit & verify content**
-  **Multiple output options**

Industries

NuOCR is a solution that can be used across industries, but most pre-built industry-specific form templates are from:

- ✓ Tax
- ✓ Social Security
- ✓ Human Resources
- ✓ Real Estate
- ✓ Healthcare
- ✓ Education
- ✓ Insurance
- ✓ Legal

Features of **NuOCR**

- » Pre-built templates: Standard template library for a wide range of industries
- » Custom template builder: Create own paper surveys or invoice templates in a few clicks
- » Multi-page templates: Templates of forms that run to multiple pages can be built on NuOCR
- » Scan paper documents to excel sheet: Transforming data on pdf files or images to editable .csv or excel formats
- » Upload image, pdf or any content file: Collect data from images files, pdf files and paper documents, validate and store it in the database
- » Easy data organization and retrieval: Organize and store your data automatically. Easy to parse and fetch during a search.
- » Integrate with database: Store your data where you want it, the way you want it.
- » Highly integrable: Easily integrate with existing applications.

Coming soon on **NuOCR**

- » Advanced search
- » Integration with cloud document repositories
- » API integration
- » More templates
- » Add your own users and roles
