

Microsoft 365 Security and Compliance Activation

Microsoft E5 license includes an infinite arsenal of tools to protect your modern environment from threats. Nevertheless, these tools might not be used to their maximum potential, because of lack of time and knowledge, and vision on their implementation.

Starting from prioritizing their implementation based on your business goals, regulation requirements and security maturity, and finalizing it with deployment and full documentation delivery, NVISO is the ideal partner to enable each feature at the right time, following your needs.

NVISO has mastered the design and implementation of the Microsoft 365 Security and Compliance toolset on many different environments. Today, we are able to foresee challenges and proactively tackle them.

Microsoft 365

Are you looking to:

Invest in the top-tier
Microsoft 365 security
license

Leverage features you
already have in your
portfolio, at their best

Migrate from legacy
security tools towards
modern XDR setup

Collaborate with a
partner who knows how
to best implement M365
Security

Get support in the early
operational
management of M365
Security

Key milestones in our projects

ASSESS

Understand the existing environment; identify gaps and plan the design changes.

DESIGN

Define the architecture and the policy baseline of the feature.

TEST

Check the impact of our decisions, using audit mode policies.

ASSESS

DESIGN

TEST

IMPLEMENT

GO-LIVE

ENFORCE

DOCUMENT & GO-LIVE

Final approval and dedicated knowledge transfer sessions

ENFORCE

Policies are changed from audit to block mode, in coordination with your engineers.

IMPLEMENT

Once tests are successful, we start the implementation track.
