

# Oakwood's AI Services Overview

At Oakwood, AI isn't just hype — it's a business tool. As a Microsoft Solutions Partner, Oakwood helps organizations design and implement responsible, scalable AI solutions that solve real problems and deliver measurable value. Whether you're exploring Microsoft Copilot, Azure OpenAI, or building custom AI-powered apps, Oakwood provides the roadmap, expertise, and support to make it real.

## Oakwood AI Service Areas

### AI READINESS & STRATEGY

Define use cases, assess data and tech stack readiness, and create a tailored roadmap

### COPILOT & M365 AI ENABLEMENT

Deploy and extend Microsoft Copilot with custom plugins, Power Platform, and Microsoft Graph

### AI APPLICATION DEVELOPMENT

Build custom AI-powered apps and solutions using Azure AI, Azure OpenAI, and Fabric

### MODEL CUSTOMIZATION & TUNING

Fine-tune foundation models with proprietary data to improve relevance and outcomes

### DATA FOUNDATIONS FOR AI

Unify and prepare data estates using tools like Synapse, Purview, and Azure Data Factory

## How We Engage

### IDENTIFY

Collaborate with business and IT stakeholders to define clear AI objectives, use cases, and success criteria. Assess data, technology, and organizational readiness.

### DESIGN

Architect scalable, secure AI solutions tailored to your environment. Address integration, data flow, governance, and user experience considerations.

### BUILD

Develop initial prototypes or pilot solutions using the right mix of Microsoft AI tools (e.g., Azure OpenAI, Power Platform, Copilot Studio). Validate feasibility and impact.

### DEPLOY

Operationalize AI solutions across your business. Monitor performance, ensure compliance, and support continuous improvement and expansion.

From improving employee productivity with Microsoft Copilot to building intelligent chatbots with Azure OpenAI, organizations are rapidly adopting AI to solve real business challenges. Oakwood helps companies automate document summarization, enhance customer experiences, forecast maintenance needs, and integrate AI into internal tools using Copilot Studio and Power Platform. We also support model fine-tuning, data classification, and governance across the Microsoft ecosystem. **Are you ready to turn your AI ambitions into reality? Let's start the conversation.**
