Power Platform Assessment Workshop

ObjectSharp helps you decide on the best approach for your low code application

Deciding on the best approach to developing your low code application is complicated. Let our certified Power Platform experts make it easier for you.

In our 1-day Power Platform Assessment Workshop, we will remotely collaborate with you to brainstorm and architect your path forward, all while sharing with you Power Platform best practices acquired over numerous projects done with clients across a broad range of industries.

By the end of the workshop, you will have an understanding of how to build your application using the Power Platform—Power Apps, Power Automate, Power BI, and Power Virtual Agents.

Within 48 hours of the workshop, we will also send you an estimate to consider should you decide to have ObjectSharp develop the application for you.

1-day Workshop
$1500 CAD
