Zero Touch Provisioning

Equip remote employees faster with Zero-Touch Provisioning of their devices

Zero-Touch Provisioning enables you to ship devices straight to users, with auto-configuration occurring over the air on initial sign in.

Provisioning devices has been a manual process for almost 30 years, taking up to 2 hours and costing up to 250 Euro per device.

OB-V-US designs and implements a solution for automated provisioning of Windows, macOS, Android and iOS.
Ship laptops, tablets and smartphones from factory to employee.

When your employee unboxes their device and sign-in your security policies, applications and content will automatically be configured.

Microsoft

Business

android enterprise recommended

SAMSUNG Knox

Step 1 : Design

V We design the zero-touch provisioning process for your Intune environment as well as a standard set of device management policies and profiles.

V This all for Windows 10, iOS and Android.

Step 2 : Implement

V We implement the approved design and integrate with Microsoft Autopilot, Apple Business Manager, Android Enterprise and Samsung Knox as required.

Step 3: Deliver

V We demonstrate the automated provisioning process for Windows, 10 macOS, iOS & Android.

V We provide as-built documentation and hands-on training for your system administrators.

"Zero Touch Provisioning now works for all devices, including Windows! Learn how you can cut provisioning time by up to 90%, eliminate device imaging, and get new employees up and running in minutes rather than hours or days."

\- Kenny Buntinx, CEO, OB-V-US-

IT'S OBVIOUS

How Zero-Touch provisioning works, to achieve your business benefits.

Step 1 : Design

ᴠ Define the different onboarding scenario's

ᴠ Identify the necessary processes for ordering devices at different vendors

ᴠ List the necessary prerequisites from networking, security and management perspective

ᴠ Find and define potential roadblocks

Step 2 : Implement

ᴠ Configure the onboarding for Apple, Android or Microsoft Autopilot

ᴠ Implement the necessary policies and deployment rules

ᴠ Install the necessary Application Stores

Step 3 : Demonstrate and Deliver

ᴠ Compliant Proof of concept to evolve and use in production

ᴠ Train staff to operate

Step 4 : Connected-Care

ᴠ Continuous support based on SLA if needed

Our Zero-Touch Provisioning

At the end of the engagement, you will have a working zero-touch provisioning mechanism for either iOS , Android or Windows Autopilot

An offer to get you started

- iOS with Apple DEP and VPP store:
  - 4 Days
- Android Enterprise :
  - 4 Days
- Windows Autopilot :
  - 5 Days

Exclusion

- Certificate deployment is out of scope if infrastructure is not available

iOS Business 4 Days 4200 Eur	Android Enterprise 4 Days 4200 Eur	Windows Autopilot 5 Days 5250 Eur

Your OB-V-US partner

ᴠ Get your info straight from Microsoft engineering teams through our MVPs.

ᴠ Our secret sauce is balancing endpoint security and employee experience. We will help you find the right balance for your organization.

ᴠ Get answers on your questions fast and clear. Our experts are just a phone call away

ᴠ Our experience will save time and avoid common mistakes.

ᴠ We have a proven track record. References available on request.
