WHAT IS OUR CLOUD PC ACCELERATION?

Windows 365 combines the power and security of the cloud with the versatility and simplicity of your PC. Windows 365 enables a variety of new scenarios for our new world of work. Our Jump Start engagement helps your business start using Microsoft's Cloud PC in a pilot form so that you can immediately see the benefits of adoption for your users.

Windows 365 enables your staff to work securely anywhere, anytime regardless of device, OS and location in a familiar corporate environment just like a corporate PC.

WHAT DO WE DO?

Our Solution Architects work with you to determine your use cases and current environment. Then we build a pilot that fits your needs perfectly. Finally, your team will demo and test the subscription-based Cloud PC service to see how it works within your environment.

OB-V-US works in a phased approach giving you continuous feedback:

PHASE 1	PHASE 2	PHASE 3	PHASE 4
Initiation Workshop	**Deploy & Configure**	**Readiness & Customization**	**Manage & Operate**
Conduct a full readiness review and develop a comprehensive approach for a production ready POC.	Deploy core services and configure your virtual environment	Install, configure, and personalize your organization's desktop images to transform the POC into production.	Monitor / management operational best practices and enable OB-V-US insights

Windows 365 Production & Follow-up
Optimize and Operate

WHAT DO YOU GET

At the conclusion of this engagement, your organization will have a pre-production-ready Windows environment deployed and configured. Azure networking and connectivity will be established, and baseline operations deployment implemented by Azure and modern workplace experts.

In this 3 day consulting engagement, the following tasks will be performed:

v Review of current Windows 10/11 licenses and options available
v Review Cloud PC level options
v Review & Setup On-premises network connections for Cloud PC to allow to:
- o Be Provisioned
- o Be Joined to your local AD
- o Provide access to local resources
v Create M365 Groups for Provisioning
v Setup initial Provisioning Policy for new Cloud PCs
v Review Cloud PC access options: browser, remote client, etc.
v Provide an overview of the management options for Microsoft Endpoint Management (MEM) of Cloud PCs

WHY OB-V-US?

v Get your info **straight from** the Microsoft engineering teams through our **MVP's**.
v Get answers on your questions **quick and clear**.
v Introduce W365 in your environment the right way and get up to speed quickly.
v **Train your internal IT** resources quickly in supporting W365
v Always have an **expert just a phone call away** when there are risks, breaches and potential security issues.

COST

Production ready POC (Phases 1-2): €4500*
