

The OB-V-US Microsoft 365 Security Accelerator onboarding Services are designed to get you up and running fast to maximize your investment.

Effective IT Security must be simple and straight forward in your environment.

When you are convinced to move to Microsoft's suite of security tools to **protect your environment**, but you need help getting up and running quickly according to **industry best practices**. OB-V-US-ly our service will provide subject matter experts that will help you to assess your current risks, provide detailed guidance on how to **leverage the M365 security solutions** to get up and running fast according to industry standards.

Step 1 : Assessment

- ✓ Detailed **assessment** of your risks
- ✓ List the necessary **prerequisites** from networking, security and management perspective
- ✓ Find and define **potential roadblocks** and the different onboarding scenarios

Step 2 : Implement

- ✓ Deploy :
 - ✓ Defender for endpoint
 - ✓ Defender for identity
 - ✓ Defender for O365
 - ✓ Microsoft Cloud app Security
- ✓ Customize, Implement and tune the **necessary policies** and deployment rules to your organization needs
- ✓ Create the necessary detection rules **specific to your organization**

Step 3 : Manage & Operate

- ✓ **Filter** out all the clutter
- ✓ Continuous support based on SLA if needed
- ✓ Add **OB-V-US Managed Detection and Response** services (MDR)

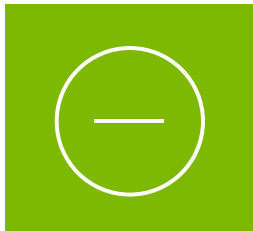

"We were looking for best-in-class M365 Security partner capabilities and found them at OB-V-US. We see their services as remarkably robust and industry leading, and it made sense for TCR to take the journey with them"

- Pascal Goormans, IT operations director, TCR -

Improve Security maturity over time

- ▼ **Security is a journey and not a destination.** Through continuous monitoring and measuring of your operational and capability maturity, you can **identify gaps** – both known and unknown – across people, process, and technology. **Prioritize and plan** how best to address those gaps, over time, to improve your overall health.

Secure more , spend less

- ▼ Enable your organization to **achieve better security** while reducing your security spend at the same time. Consolidate tools and vendors and **maximize value** achieved by ensuring you use the Microsoft services you are licensed for. **Simplify your security management** through consolidation to a single market-leading vendor.

Secure expertise where you need it most

- ▼ Focused expertise where it matters most to **ensure you are managing** and monitoring the platforms and security tools you have in-place. Prevent misconfigurations that put your **business at risk**. Reduce alert fatigue by augmenting your team with our team of experts.

Secure your modern workplace with a modern approach

- ▼ Leverage modern security platforms purpose-built to **secure your organization** across your digital footprint including identities, devices, applications, infrastructure, network, and data. Microsoft's XDR capabilities combined with **zero-trust approach** will help your organization address security for the modern workforce.
