

Smarter Insights for Better Outcomes

Real-time, research-grade analytics to optimize care, improve efficiency, and drive growth.

Clinical

Procedure Identification

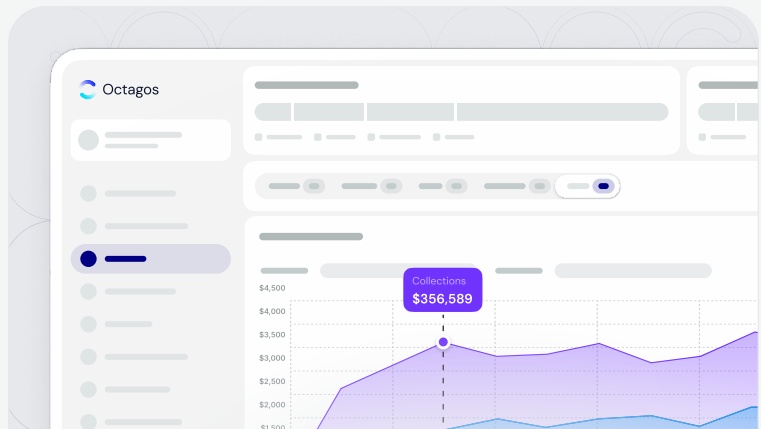

Identify necessary interventions like ablations, upgrades, lead extractions, and guideline-directed therapies.

Operational

Own Your Investment

Instantly validate practice patterns like implant volume, device types, and vendor market share.

Financial

Billing and Claims

Optimize your clinic's revenue with real-time claim and billing analytics.

"...Octagos goes to the next level providing user friendly software to seamlessly perform population analytics on all our patients with CIEDs. By providing insights into patient trends and at-risk populations, it's helped early identification of cases needing additional attention. These population analytics have elevated the care of our patients."

— Colin Movsowitz, M.D., FACC, Electrophysiologist
