Every Device, Every Workflow

Octagos is vendor-agnostic, integrating seamlessly with:

Implantable Cardiac Devices

Including pacemakers, defibrillators, CRTs, and loop recorders.

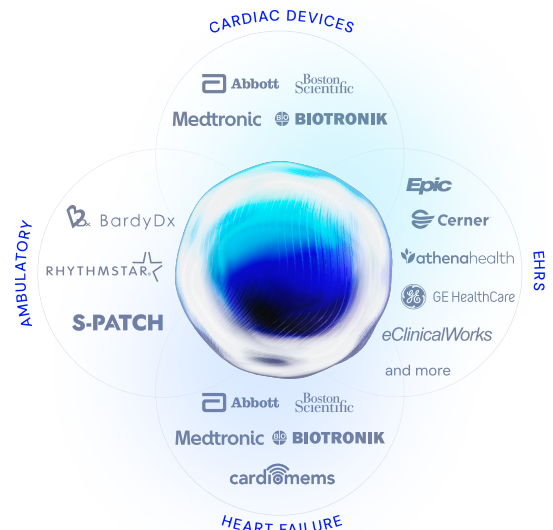

Ambulatory Cardiac Monitors

Unifying data from a range of Holter monitors, wearable ECGs, MCT, and more.

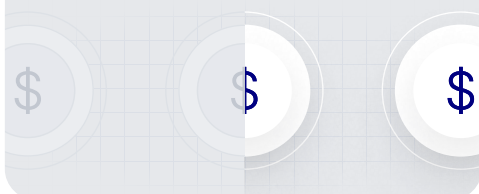

Heart Failure Solutions

Dedicated workflows and billing solutions for CardioMEMs and device-based heart failure tools.

Transparent Pricing

Cost-effective plans for maximum clinical value.

Atlas AI Precision

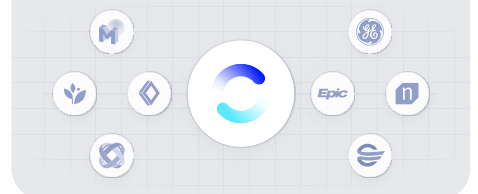

AI-powered reports for unmatched clinical accuracy.

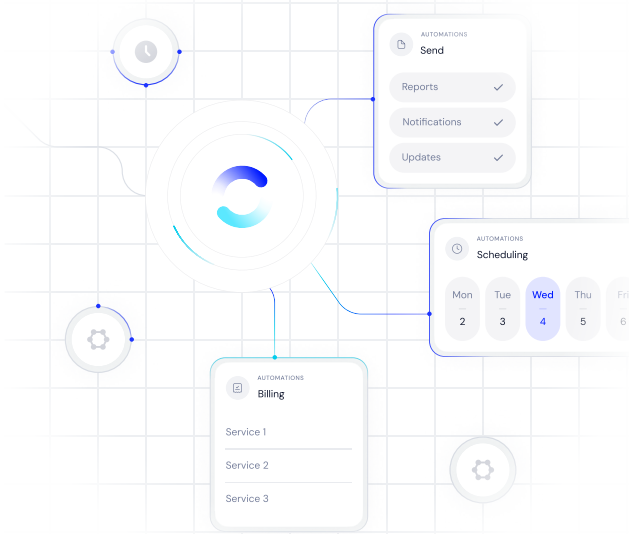

No anti-coagulation noted in chart

Fast & Flexible Integrations

Rapid, bidirectional integrations with no-cost setup.

Effortless Automation, Maximum Efficiency

Prioritizing patients, not paperwork.

Goodbye Busy Work

CPT, diagnosis codes, and billable transmissions — automatically assigned and sent.

Time-Saving Tools

Automatic adjustment of vendor schedules and settings – no more digging through vendor sites.

Prioritize What Matters

Actionable patients are automatically highlighted. The information you need, when you need it most.
