Nucleus implementation cost and value proposition-1

Index	Iteam	Cost
1	one time implementation cost	USD 0
2	Monthly Recurring charges	Free for first 10 users post that USD 10/User/Month +GST
	Total payable amount for 2 year	USD 24000+ GST

Note: Monthly recurring charges includes up to 10 hours enchantments/modification/development support , cloud infra cost and dedicated query handling support for a given geography

Value proposition for 2 year (considering Company have 100 Power BI and 100 Tableau users)

Index	Iteam	Cost
1	1PBI Annual license cost for 100 users	USD 24000+ GST
2	2Tableau Annual license cost for 100 users	USD 28800+ GST
	Total Saving in 2 year	USD 52800+ GST

Conclusion: Nuclues will save USD 28,800 in 2 year itself which is 100% profit post recovering invested amount. If number of users are high then savings would be higher

Nucleus implementation cost and value proposition-2

Index	Iteam	Cost
]	one time implementation cost	USD 6000+GST
2	Monthly Recurring charges	USD 500+GST
	Total payable amount for 2 year	USD 24000+ GST

Note: Monthly recurring charges includes up to 10 hours enchantments/modification/development support, cloud infra cost and dedicated query handling support for a given geography

Note: Given proposal is for approx 100 users , if organization has more users then USD 5/User per month extra will be charged although overall saving of organization with more number of users would be high

Value proposition for 2 year (considering Company have 100 Power BI and 100 Tableau users)

Index	Iteam	Cost
1	1PBI Annual license cost for 100 users	USD 24000+ GST
2	2Tableau Annual license cost for 100 users	USD 28800+ GST
	Total Saving in 2 year	USD 52800+ GST

Conclusion: Nuclues will save USD 28,800 in 2 year itself which is 100% profit post recovering invested amount. If number of users are high then savings would be higher

Ms office solution will

work as

Nucleus implementation collaboration model

Opportunity of creating

new revenue sources

This will create an opportunity

of finding new ways of

generating revenue

We operate on a 60-40 revenue share model, wherein we retain 60% of the deal amount and our partner receives 40%. This structure ensures a fair distribution of revenue based on our respective roles and contributions.

Branding

Product will have logo of your organization hence it will create brand name of yours

For monthly support charges, we use an 80-20 model. In this arrangement, our partner earns 20% of the support revenue on a recurring basis, reflecting their ongoing involvement in support activities.

Office Solution is responsible for all implementation and support tasks, while our partner manages project management and monitoring. This division of responsibilities allows each party to focus on their core strengths.

Client Satisfaction

This product will give high client satisfaction which will create new opportunities for your organization

Case Study- A Real Estate Brokerage company

Solution Offered

Nucleus was implemented for client , same was hosted on AWS cloud in managed environment (

Our Client was one of the leading brokerage firm in India Laxmi Homes having 50+ offices in India

Business Impact

Nucleus implementation saved the client \$1,000,000 annually on licensing costs, improved reporting and BI governance, and enhanced user experience.

Challenge!!

The client used multiple BI and reporting solutions, including over 100 Excel reports distributed via email, which were challenging to manage. They also utilized multiple Power BI licenses.

Client?

Efficiency:

Streamlined report management, reducing complexity and improving overall efficiency.

Case Study- A MLM company

Solution Offered

Nucleus was implemented and hosted in an on-premise environment.

Aware India, a leading MLM company in India with 500+ employees.

Business Impact

Nucleus saved the client \$1,500,000 annually on licensing costs, significantly improved governance around reporting and BI processes, and reduced time and effort, leading to a richer user experience.

Challenge!!

The client used multiple BI and reporting solutions, including Excel, SharePoint, and Google Sheets, which were poorly managed. They also relied on 50+ Power BI licenses and 100+ Tableau licenses.

Client?

Efficiency:

Streamlined report management, reducing complexity and improving overall operational efficiency.
