

# DATA Powered PLANOGRAMS

## Our Solution

### DATA INTEGRATION

We fully integrate into your existing retail planning and forecasting systems – building on investments already made. We start by leveraging your retail data and optimizing it.

### OPTIMIZE PLANOGRAMS

Once our solution has run many scenarios with the data, it generates an executable planogram that can integrate seamlessly back into current retail systems.

### INSIGHTS, RESULTS, AND REPORTING

Our Omnistream retail expertise paired with actionable insights reporting from our solution creates opportunity for retailers to track and analyze growth and profitability metrics.

### WHAT WE DO

At Omnistream, our data-powered solution allows retailers to integrate their sales and product data seamlessly to create optimized, store-level planograms in minutes.

### WHAT OUR CUSTOMERS SAY

"Omnistream managed our network-wide store-level assortment roll-out during a time when shopper behavior changed more in 6 months than in 35 years."
