

ZERO TRUST FAST TRACK

Accelerate your Zero Trust implementation with our Zero Trust Fast Track program. Designed for swift and effective deployment, this bootcamp-style program quickly gets your organization up and running with Zero Trust principles. Our experts deliver a comprehensive, prioritized roadmap tailored to your needs, and deliver hands-on help with the initial steps.

CYBERSECURITY STRUGGLES

- Our enterprise architecture lacks integration of Zero Trust principles.
- High costs due to fragmented and inefficient security measures.
- Difficulty in scoping compliance requirements to specific systems and applications.

ZERO TRUST SOLUTIONS

- We transform our enterprise architecture to incorporate Zero Trust, enhancing cybersecurity resilience.
- We optimize our security measures, resulting in cost-effective and streamlined processes.
- We clearly define and manage protect surfaces, ensuring regulatory and industry compliance on a detailed level.

WHAT DO YOU GET OUT OF ZERO TRUST

We understand that implementing a new cybersecurity strategy is an organization-wide initiative. Aligning all stakeholders and different departments is crucial in ensuring this is a smooth process. Zero Trust Fast Track caters to different needs for specific stakeholder groups.

BOARDROOM

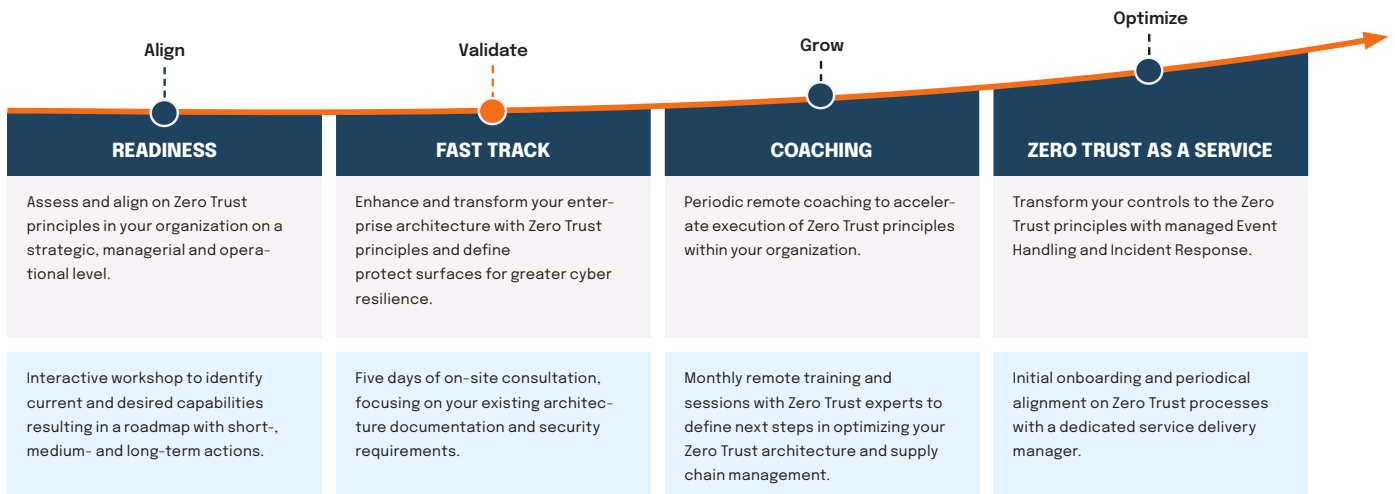

Ensures enterprise architecture evolves to **meet advanced cybersecurity threats**, reinforcing board confidence in IT strategies.

MANAGEMENT

Accelerates **enterprise architecture modernization**, directly supporting business agility and resilience.

IT OPERATIONS

Enables structured updates and modernization efforts that are **compliant and cost-effective**.

HOW DOES IT WORK?

During five days of on-site consultation, we take an in-depth look at your existing architecture documentation and security requirements, together with your own enterprise architects. We focus on how to enhance and transform your existing enterprise architecture into a Zero Trust architecture.

As a result, you are provided with a detailed architecture of a number of protect surfaces (segments within your architecture), which will also be registered in our AUXO™ platform (the only platform that makes Zero Trust operational) for easy access and overview.

Each organization is looking for different types of guidance when it comes to Zero Trust, depending on their starting point and end goals. The table below indicates the differences between the four ways to get started with Zero Trust.

	ZT READINESS	ZT FAST TRACK	ZT COACHING	ZTAAS
Approach	Strategic	Accelerated	Tailored	Strategic, Tailored
Focus	Assessment and roadmap	Rapid deployment	Skill development	Overall cybersecurity operations
Engagement	Short term, intensive	Short term, intensive	Long term, ongoing	Long term, ongoing
Customization	High	Medium	High	High
Outcomes	Defined strategy and roadmap	Quick implementation	In-depth knowledge	Optimized cybersecurity strategy
Deliverables	Detailed assessment and deployed solution	Up to five identified, defined and ready to implement protect surfaces	Personalized coaching on your Zero Trust implementation	Zero Trust implementation
Ideal for	Organizations at any stage of their Zero Trust journey	Organizations with limited time and resources	Organizations with dedicated security teams	Organizations interested in a managed security solution

WHY ON2IT?

WE SECURE

ON2IT brings **19 years of experience** in implementing, configuring and managing security strategies.

WE COMMIT

In the past 3 years we completed hundreds of projects that we surveyed on satisfaction, where clients awarded us an average satisfaction score of **9.2**.

WE INNOVATE

Our consultants complement our assessors with a variety of hands-on experiences and skills from **hundreds of projects** to get you the best possible experience and advice.

"ON2IT HAS IMPLEMENTED MORE ZERO TRUST ARCHITECTURES AND NETWORKS AT CUSTOMER SITES THAN ANY CYBERSECURITY COMPANY WORLDWIDE."

JOHN KINDERVAG
- CREATOR OF ZERO TRUST
