# 2FA Authentication

Forget outdated authentication methods like email or SMS for a cloud-based, high-grade authentication system that safeguards against forgotten or stolen login details and lost devices. Conduct a quick identity verification check and implement seamless biometric authentication using existing data to ensure secure remote communication for returning users.

# Ondato Authentication

**Combines efficiency and security with biometric authentication**

**Double-checks user data with biometric authentication**

**Protects your clients' accounts from hackers**

**Allows for accessible processes for clients**

Benefits

Fast returning user data confirmation

Robust security measures

Simple integration

Easy-to-use authentication tool for clients

ondato

**OnlyFans**

Case study

# OnlyFans

With the help of Ondato, OnlyFans has employed a genuinely secure authentication method, which enables returning users to log back in using biometric data as confirmation. It ensures the returning users are who they say they are and protects clients in case of forgotten or stolen login details, as well as lost devices.

Ondato's easy-to-integrate solution ensures efficiency and accessibility when utilising authentication, creating a process that is far safer than traditional 2FA methods such as email or SMS.

READ MORE

> " Ondato is a trusted and valued business partner. Their market leading age and identity verification technology is a key element of OnlyFans' safety controls. We enjoy the close working relationship we have with their team and we know that they value our feedback and reflect this in their product roadmap.
