on age

Reusable Age Verification

Verify with 98% accuracy - Reuse without storing personal data

Ondato stands out as a leader, offering years of expertise in delivering comprehensive and reliable age verification solutions. With our experience dealing with even the strictest legal and regulatory requirements worldwide, we were able to create a reusable age verification solution.

What is Reusable Age Verification?

Our solution ensures user age can be verified while maintaining anonymity, complying with age verification regulations around the world.

Why businesses use Reusable Age Verification?

- To securely verify user age online

- To allow for convenient, reusable verification

- For automated, document-free age checks

- To maintain complete user anonymity

- To comply with the latest age verification regulations

Anonymity

- Minimises the need for identity document checks

- Does not store any identifiable information

- Complies with COPPA, GDPR, DSA, PIPEDA and other laws

- Uses advanced biometrics technology

Reusability

- Convenient, fast solution for returning users

- Saves on resources without compromising compliance

- Unlimited repeat access for a set period of time

Complete Coverage

- Automatic checks

- Get started in just 24 hours or get customised integration within one week

- 24/7 support

98% to 100% accuracy
