

# ONE CLICK SERVICES API SUITE

## BUILT BY DEVELOPERS, FOR DEVELOPERS

Are you looking for a more customisable solution? Look no further than our One Click Services API Suite, designed with a focus on security, flexibility, and seamless integration.

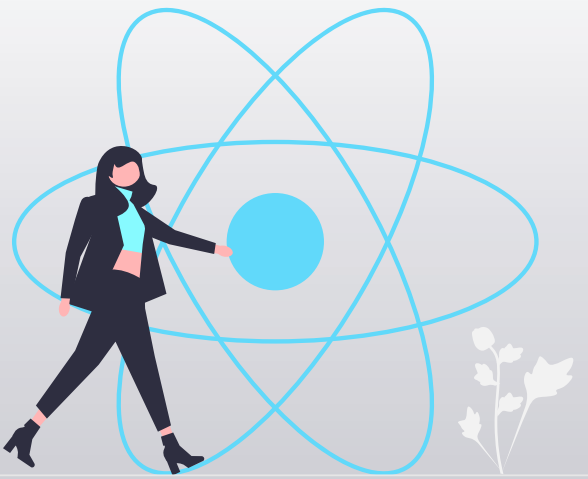

Built by developers, for developers, our APIs empower you to integrate robust document and identity verification capabilities into your existing systems, providing your customers with a personalised UI/UX experience.

We've done the heavy lifting so you can concentrate on driving your business forward, all while ensuring security and compliance across various industries.

## KEY FEATURES

- > **DVS Document Verification (Active):** Quickly and reliably verify Australian documents using official data sources, guaranteeing the authenticity of vital information.
- > **PEPS and Sanctions Checks + Report (Active):** Screen individuals against politically exposed persons (PEPs) and global sanctions lists to mitigate risk and enhance security.
- > **E-passport Scanning with NFC Technology + Liveness and Likeness (Active):** Leverage cutting-edge NFC technology to scan e-passports from over 170 countries. Gain a comprehensive identity profile while ensuring document authenticity with advanced liveness and likeness checks powered by machine learning.
- > **Liveness and Likeness (BETA):** Onboard with confidence and defend against various spoof types ranging from paper printouts, 2D/3D masks and spoof presentations on phones and laptops.
- > **Facial Verification Service (FVS) (TBA):** FVS allows for matching individuals with official images from document issuer databases, ensuring a high level of identity verification.
- > **Mobile Driver's License (TBA):** Preparing for the future with the adoption of ISO/IEC 18013-5:2021 for verifying digital driver's licenses.
- > **Bank Account Verification (TBA):** Verify bank account ownership to reduce the risk of monetary loss.
- > **Mobile Number Verification (TBA):** Authenticate registered mobile numbers for added security.
- > **Tax File Number Verification:** Available to approved recipient under The Privacy (Tax File Number) Rule 2015 e.g. solicitors, tax agents etc. to see full list Classes of lawful tax file number recipients | OAIC or contact us to discuss.

## SEAMLESS INTEGRATION

Our API-driven solution offers seamless integration into your existing systems, providing a hassle-free experience for both developers and end-users.

With just a few lines of code, you can harness the power of our identity verification services, allowing your platform to verify documents, screen individuals against global watchlists, and authenticate users with ease.
