

COGNITIVE INTEGRITY MANAGEMENT

MAKE PIPELINE FAILURES A THING OF THE PAST

WITH THE ASSISTANCE OF
MACHINE LEARNING & DATA SCIENCE

Leverage a fully integrated enterprise platform and get ahead of regulatory compliance requirements, peer financial performance, gain insights into the performance of your assets so you can ensure business is running optimally.

ELEVATE INTEGRITY MANAGEMENT PERFORMANCE

Transform pipeline integrity management through an enterprise SaaS based solution and start impacting your bottom line. Cognitive Integrity Management is a platform geared towards addressing your regulatory compliance and internal operations goals. Leverage a fully integrated enterprise level solution engineered to provide you a complete overview of your asset health in a highly secure Microsoft based application.

Regulatory Compliance

- Audit ready all the time
- Automated PHMSA reporting
- Covers time dependent mandatory regulatory requirements

Exceed Peer Financial Performance

- Maximize fund allocation
- De-risk IMP & Reduce Costs
- Process Standardization

Fully Integrated Enterprise Platform

- Gain clarity into asset health
- Microsoft secure
- SMEs core tenant of CIM

Performance and Insight Reporting

- 100s of dashboards & reporting
- Drilldown to specific anomalies to drive business decisions

We have helped Fortune 500 companies like you with predicting pipeline failures with the assistance of machine learning. Let us work with you to design and implement a plan to optimize your integrity management operations.

Start the digital transformation within your Integrity Team

How can you transform your integrity efforts?

Streamline, predict and analyze – leave manual time-consuming processes behind. Focus on what's important - making pipeline failures a thing of the past.

Lead the adoption of cutting edge software and expand integrity efforts to include the ability to review all anomaly and feature data

Gain visibility into the entire pipeline. Bubble up and drill down to the finest level of detail through an interactive Business Intelligence Platform

Elevate the confidence level with excavations planned and executed. Pinpoint the exact location of anomalies

Present invaluable findings through real-time reporting and dashboards in minutes.

Leverage the ability to gather insights from pattern detection and interactive threats rather than single data points

Get ahead of audit reporting and PHMSA requirements by leveraging insight reporting prebuilt according to regulation

WE'VE TEAMED UP WITH THE BEST

We are an Independent Software Vendor (ISV) to Microsoft. OneBridge prides itself on developing, marketing and selling software through the Microsoft Partner Network!

INTERNATIONAL COVERAGE

We can support pipeline operators internationally as long as there is a Microsoft data-center that exists within the country. We can work with local Microsoft Account Executives to get you up and running on Azure and Cognitive Integrity Management.

Join Your Peers

Leverage the power of data science and machine learning to elevate your analytics to optimize your operations strategy.

WHY ONEBRIDGE ?

OneBridge Solutions Inc. is dedicated to helping predict pipeline failures to save lives and protect the environment. We utilize proprietary Machine Learning algorithms and a single geo-spatial database that accommodates pipe-centric, structured and unstructured big data, with capability to address the key functions that pipeline companies require to manage, operate and maintain their pipelines.
