Digital transformation with zero code.

What is no-code development?

No-code development platforms allow business users to create applications without writing a single line of code. These platforms also allow companies to quickly iterate on new processes, making them a valuable tool for business innovation. The future for no-code development looks bright because demand from business divisions outpaces the ability to develop and maintain applications.

Empower your workforce

Many businesses still use outdated methods to manage their operations and are looking for ways to improve business processes. These inefficient practices can lead to significant problems, including lost time and money, decreased productivity, and even customer dissatisfaction.

OLS360 is for teams looking to work smarter, not harder. It offers a seamless way to integrate business processes into one easy-to-use platform. You are able to manage everything from workflows to administrative tasks. Thus, with OLS360, you have a clear picture of what needs to be done and who is responsible for every task.

Integrate solutions without delay

Stop wasting time and money on software development projects that never seem to end. With our no-code platform, you can create custom business processes in a fraction of the time it would take with traditional methods. That means you'll get your project done on time and under budget – without sacrificing quality or features.

Imagine being able to solve your most pressing business challenges with a no-code solution that's tailored specifically for your company. With OLS360, it's now possible.

OLS360: The Platform

OLS360 is a no-code platform that was conceived specifically to design information systems for the business environment. The platform is highly extensible and scalable in deploying data and business process strategies. This allows IT departments to quickly deliver new software solutions to the company.

Also, the platform is coupled perfectly by an extensive data security layer that enables proper sharing of information among appropriate individuals throughout your organization.

What you can do with OLS360?

OLS360 can automate any process that resembles: fleet and property inspections, production quality assurance, performance reviews, internal audits, safety meetings, and incident and fraud investigations, to mention a few. Because these solutions are under a single platform, it saves considerable time and money regarding training and subscription costs. The best part is these tailor-made processes can be implemented quickly as needs arise.

Unlock business potential using OLS360 analytics services

OLS360 platform comes with a slick integration to Power BI, the world-leading data analytics tool that makes it easy for you to find insights in your data, share discoveries with others, and quickly turn insights into action.

Additionally, we offer professional services in data analytics, helping companies implement a Power BI strategy into their operations. **These services can be commissioned even if you are not ready to subscribe to the OLS360 platform.**
