Power Platform Workshop

Date: Scheduled on demand | Duration: 4 hours

Details

The OneNeck Power Platform workshop is a hands-on workshop that provides attendees with a basic understanding of the Microsoft Power Platform and its uses. The workshop consists of presentations, demos and hands-on labs.

Expectations

After completing the workshop, you can expect to have a basic understanding of the Microsoft Power Platform and the services it provides. Lecture will cover use cases, basic administration, Power Apps, Power Automate and Power Virtual Agents. Labs will cover creating solutions, Power Apps Canvas Apps and Power Automate Cloud Flows.

Prerequisites

- You will be provided an O365 account to log into for the lab exercises.
- This is a beginner level course on the Microsoft Power Platform. Previous experience using SharePoint online lists is helpful but not required

It is highly encouraged to have 2 monitors for this session so that you can follow along with lab instructions on one screen and complete the exercises on the other.

Agenda

Power Platform Overview

Lab part 1 – Environments and Solutions
