

Safety and quality software for hospitals and healthcare

Whether you're a new healthcare organisation or an established institution, OneVault is the software solution you need to meet your clinical governance and accreditation requirements while improving patient safety and quality.

**Tackling spreadsheets,
chasing evidence and
draining resources —
there's a smarter way
to work. OneVault helps
healthcare stay on top of
safety and quality, simply,
efficiently and securely.**

OneVault is the most comprehensive system on the market, providing you with all the tools you need.

Easy to use and simple to navigate, OneVault is the perfect software for busy health services looking to reduce time and money spent on clinical governance.

Purpose built for short notice assessments means no extra work and no nasty surprises when the auditors come knocking.

We have you covered with preloaded reports, plans and tools, and options for safety and quality check-ins with OneVault experts.

Our customer support team are always available to ensure you have the help you need and your staff have a great OneVault experience.

OneVault's smart reporting makes it easier than ever before

While evidence management and reporting can be a daunting task, OneVault makes it easier than ever before. With our smart reporting options, you can report by any mix, number and type of standard. Plus, it's fully customisable to get the most out of your clinical governance data.

Accreditation Reports

Everytime you hit save, your work is neatly filed as evidence against your customised accreditation standards ready for when the assessors arrive. No copy and paste or drag and drop required.

Report Boards

Create beautiful presentations for committees and the boardroom with graphics, text, images and videos, ready to go in minutes.

Dashboards

Track compliance, trends and monitor feedback at any level, from organisation wide to a single department.

OneVault is modular making clinical governance integrated and orderly.

Credentialing

Engage, support, collaborate and inform — connect your staff with information modules.

Documents

Documents module securely stores all your policy, procedure and important documentation in one easy access place.

- Full document control
- Automated alerts
- Collaborate
- Track changes
- Add images, videos and links
- Easy search function

Registers

Registers module organises and tracks important items. It's the perfect tool for staying on top of things like equipment lists, maintenance schedules and other items that require ongoing management.

- Design your own registers
- Automated date triggers
- Add notifications per item
- Collaborate
- Easy to navigate
- Never forget important items

News

Keep everyone in the loop by sharing interesting updates, clinical trials, projects, updated policy and procedure and more.

- Create news posts to share
- Link news to surveys, training etc
- Add images and URL links
- Schedule start and end dates
- Send news to staff email inboxes

An integrated approach to risk, incident and feedback management

Risk

Risk module does away with unnecessary complexity to provide you with a simple way of monitoring and managing all your risks.

- Confidential function
- Link to incidents
- Graphic reports
- Add images and documentation
- History log with version control
- Notifications and alerts

Incidents

Incidents module makes reporting painless for your staff, supportive for managers and insightful for executive.

- Easy incident form
- Alerts and sentinel event notifications
- Review function
- Dashboard tracking
- Automated action plans
- Track lessons learned

Feedback

Track and trend compliments and complaints so you know what areas need improvement while also seeing success in action.

- Fast feedback form
- Dashboard tracking
- Drill down data
- Automated action plans
- Assign corrective actions
- Alerts and notifications

Powerful tools to monitor and track performance driven by accurate real time data.

Clinical Indicators

Clinical Indicators module collates, organises, compares and displays, making the collecting and analysing of data a breeze.

- Store and track clinical data
- Compare against aggregate rates
- Manage across specialties
- Add notes and reports
- Easily identify outliers
- Assign and track actions

Mortality

Mortality module gives you a clear picture of how your contributing factors impact events, and where you can make improvements.

- Dashboard reports
- Confidential function
- Assign categories
- Track contributing factors
- Automated action plans
- Review as a team

Audit and Survey

Audit module tracks performance, simplifies auditing and replaces number crunching and data manipulation with automated reporting.

- Purpose built for healthcare audit and surveying
- Question logic
- Audit comparisons
- Graphical reporting
- Corrective action assigning and tracking
- Automated alerts

Purpose built accreditation modules for tracking, planning and quality improvement.

Accreditation Manager

Accreditation Manager is unique to OneVault. See existing evidence against your Standards and quickly allocate tasks to bridge any gaps.

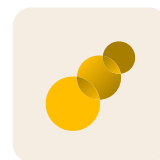

- Manage any number, type and mix of standards
- Accreditation progress graphs
- Add evidence and identify gaps
- Allocate tasks required
- Track progress and compliance
- Alert and notifications

Planner

Stay on track with your projects, action plans and gap analyses while gathering evidence and monitoring progress through real-time reporting.

- Plan projects, a gap analysis or a to do list
- Set goals and actions
- Collaborate
- Assign tasks
- Set dates and track progress
- Upload relevant documents

Quality Projects

Quality Projects makes improvement work engaging while supporting staff to lead best practice initiatives.

- Clinical practice methodology template
- Collaborate
- Log team activities
- Alerts and notifications
- Track progress
- Report outcomes

Integrated learning and credentialing modules lift OneVault to an all in one system.

Learning

Learning Manager is a flexible, convenient way to deliver training, track compliance, identify and address knowledge gaps.

- Create your own e-learning topics
- Link and track learning from other websites
- Add videos, images and additional reading
- Add quizzes, set pass and fail rates
- Compliance dashboards
- Track practical training

Credentialing

Credentialing module helps you keep track and monitor the scope of practice and credentialing that may be applicable to employees.

- Manage staff credentials with reports, alerts and notifications
- Create credentialing registers
- Add staff, requirements and evidence
- Enable staff to move evidence to/from CPD
- Committee authorisation function
- Track scope of practice

Get started in three easy steps

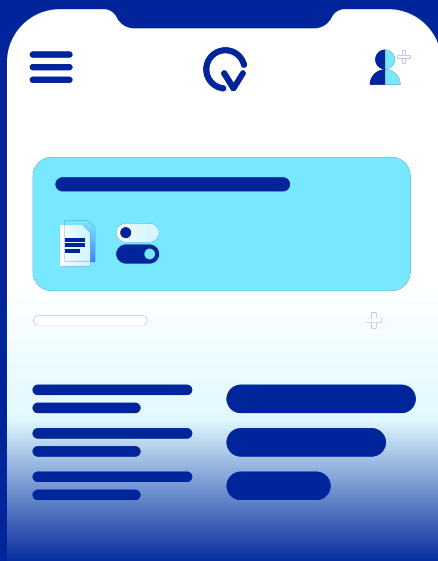

Step 1
Select Modules

Step 2
Customise settings

Step 3
Start creating

It's all about you

Choose the modules that work for you. OneVault is so flexible you can start with a few and build as you go.

Every organisation is unique, we customise the software to suit your specifications and accreditation standards from day one.

Now it's time to start creating. With OneVault support, preloaded reports and expert advice, you'll be immediately up and running.

OneVault is big on support. It's one of the things we do best. No bots, no self-help forums, just real people helping people, one on one.

Make the switch and experience accreditation with software that does all the heavy lifting.
