

Microsoft Compliance Manager

BRING IT INTO FOCUS

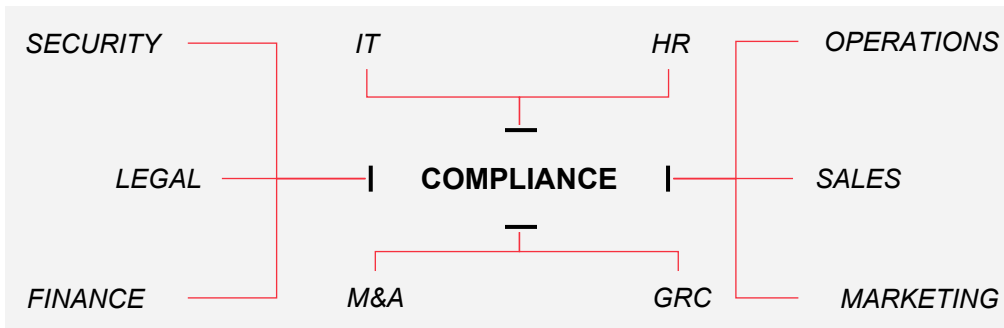

Onevinn's Microsoft Compliance Manager Engagement provides the capabilities for organizations to track, align and record compliance towards ISO, NIST, HIPPA, GDPR and key regulations.

The ongoing digital transformation has developed new political and corporate trends for many organizations and generated an exponential growth of data and information.

In addition, more and more new regulatory requirements are introduced every year to new markets and industries, creating challenges for organizations to take greater responsibility and liability.

Microsoft Compliance Manager is an intelligent compliance management solution that provides capabilities such as insight, discovery, protection, and automation to increase management towards regulatory requirements
