# Data Engineering: 5-days workshop

## About Company

We are Poland's largest provider of Microsoft cloud services (Office 365, Microsoft 365, Azure) to consumers and micro and small businesses and the market leader in online training on Microsoft software. We supporting business and improving processes in organizations using the latest Microsoft technology, and above all - the knowledge and experience gained in cooperation with companies from various sectors. Even the simplest solutions may bring real benefits, therefore the basis of our activity is a conversation. At the beginning we define the needs and problems, which sometimes can be solved only by optimization of Microsoft365 licenses, Microsoft Azure environment and sometimes by data visualization using Power BI.

## What we offer

Workshop is aiming to get familiar with Azure Data stack and help Data Engineers start journey with data in Azure Cloud.

During workshop you can reach following goals:

- Explain **how to use data services** in Azure and how to combine them together.
- Learn on **how to use efficiently** dedicated tools like SSMS, SSDT, ADS, Azure Portal, DevOps.
- **Understand** deeply data development lifecycle in Azure Cloud.
- **How to work securely** with data assets.
- Show **good, best and recommended** practices.

# Why Microsoft Azure ?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
