**onex.group** **Trusted Microsoft partner.**

More than infrastructure – Licenses, MS software, CSP provider
- MS licenses and software reseller
- Basic and Premium support for subscriptions
- 12k+ satisfied customers

Azure and M365 clouds expertise
- End-to-end data services expertise
- M365 advisory and adoption – licensing model optimization
- Security for Azure and M365

Tailored solutions
- Strong eCommerce experience
- Flexible cooperation models including managed service, team extensions etc.
- Tailored architecture for business profile.

Areas of expertise

Microsoft Azure and M365 cloud first!

Data & Analytics

Gain more insights from data

- Data integration (ETL/ELT)
- Data Warehouse
- Data Visualization in Power BI
- Advanced Analytics
- Machine Learning
- Data Governance

Modern Workplace

Efficient communication

- Hybrid workplace with M365
- Efficient communication and mailbox migration
- Power Platform (Apps, Flow)
- Remote office with Teams
- M365 Optimization

Software development

Digital transformation

- Advanced solution on Microsoft Azure (Azure PaaS, Serverless)
- Tailor made solution based on .Net technology
- Web, IoT and mobile applications
- Knowledge Mining
- Cognitive services implementation

Cybersecurity

Secure cloud environment

- Microsoft 365 (EMS, Azure AD, information protection)
- Cloud Security (Azure Sec, SecOps)
- Azure and M365 security
- Assessment and audit M365 and Azure
- Microsoft Sentinel/SIEM

Cloud operations

Automations and operations

- CSP provider
- Azure & M365 Governance
- Cloud IaaS, containerization
- Migration to cloud
- Hybrid setups
- DevOps, IaaC and CI/CD

Data Migration Assessment

Elaborate your path to Modern Azure Data environment with Onex Group in 3 steps!

Discover & Understand	Consider & Plan	Summarize & Show the Way

**1ˢᵗ Step**

2ⁿᵈ Step

3ʳᵈ Step

Understand current data assets

- Evaluate your current data environment (type, volume, count)
- Understand data workloads and assets
- Identify data dependencies, business requirements and risk

Consider and select options

- Compare different migration options and find best matching migration solutions
- Select and recommend best matching target Azure services
- Current-Target environment services mapping

Show next steps

- Current situation summary (current state) and future solution (target state)
- Migration approach and strategy
- Azure Consumption Rate (ACR) estimation
- Estimated implementation costs and timeline
