

Secure AI Launchpad for Nonprofits

5-Day Copilot & Power Platform Deployment

Responsible AI governance built in from day one - not bolted on at the end.

Investment
\$18,000 AUD
5-day engagement

Duration
5 days
Spread over 2 weeks

Delivery
Remote
Worldwide

PROVEN NFP OUTCOMES

8 hrs
Saved per enrolment

2 wks
Off grant writing

40%
Less admin burden

79%
Drop in recidivism

"This system has given us time back. We can get off the computer and show up for what we're here for — our young people."

Camille Pepper, CEO — Everything Suarve

"Veterans now know they can get immediate help. The VWMS has transformed how we deliver support."

Kellie Harrison — Veterans' Wellbeing Network

OVERVIEW

Most nonprofits are sitting on untapped AI potential - but the barrier isn't the technology, it's knowing where to start safely. Copilot hallucinations, uncontrolled data flows, and staff distrust can all undermine an AI rollout if governance isn't designed in from day one.

ONGC Systems' Secure AI Launchpad delivers Microsoft 365 Copilot and AI-enhanced Power Apps into your NFP environment in five structured days, with responsible AI governance, Microsoft Purview compliance controls, and Entra ID security built in from the ground up, not bolted on at the end.

We have done this before. Our work with the customers is featured on several Microsoft Customer Stories, demonstrating what secure, purposeful AI looks like for nonprofits.

5-DAY ENGAGEMENT PLAN

Day 1	AI readiness & security assessment Review your Microsoft 365 environment, data landscape, Entra ID configuration and AI risk profile. Identify data sovereignty requirements, readiness gaps, and any remediation needed before Copilot is activated.
Day 2	Data governance & responsible AI framework Design your DLP policies, Microsoft Purview sensitivity labels, Dataverse security roles, and responsible AI usage guidelines tailored to Australian Privacy Act requirements and funding body obligations.
Day 3	Microsoft 365 Copilot deployment & configuration Deploy Copilot across Teams, Outlook, Word and SharePoint with scoped access controls. Configure for grant writing, board reporting, funder correspondence, and document summarisation grounded on your own data.
Day 4	Power Apps + AI Builder integration Enhance case management and intake workflows with AI Builder automated form processing, predictive triage and natural-language interaction. Copilot-assisted reporting auto-generates funder outcome summaries.
Day 5	Training, adoption & ongoing governance Full-team Copilot and AI Builder training. Handover of Responsible AI playbook, governance runbook, and 90-day adoption roadmap. Includes 30-day post-deployment check-in.

WHAT YOU RECEIVE

01	AI Readiness & Risk Report	Written assessment of your environment, data risks, and readiness gaps with prioritised remediation steps.
02	Secure AI Governance Framework	DLP policies, Purview sensitivity labels, Dataverse security model, and Responsible AI usage policy tailored to your NFP.
03	Copilot — deployed & configured	Copilot live across Teams, Outlook, Word and SharePoint with scoped access controls, grounded on your organisational data.
04	AI-enhanced Power Apps	AI Builder integrated into your case management or intake app with automated processing and Copilot-generated outcome reports.
05	Training & 90-day roadmap	Hands-on staff training, Responsible AI playbook, governance runbook, and 30-day post-deployment check-in with ONGC.

TECHNOLOGY STACK

Microsoft 365
Copilot

Power Apps + AI
Builder

Power Automate

Microsoft
Dataverse

Microsoft Purview

Microsoft Entra ID

SharePoint

Power BI

Microsoft Teams

Outlook + Copilot

WHO IS THIS FOR

Youth & community services NFPs

Organisations running programs, case management, and funder reporting who need AI that's safe, explainable, and auditable.

Veterans & welfare advocacy orgs

ESOs and advocacy groups handling sensitive client data who need Copilot deployed with proper security and compliance controls.

Government-funded NFPs

Organisations whose funding agreements require evidence-based outcome reporting and who want AI to generate that evidence faster.

NFPs already on Microsoft 365

Teams already using Teams, SharePoint and Outlook who want to responsibly activate the Copilot licences they already have.

Ready to deploy secure AI in your NFP?

Book your 5-day Secure AI Launchpad. No obligation required to start the conversation.
