Configurable & Fail-Safe On-Call Schedules

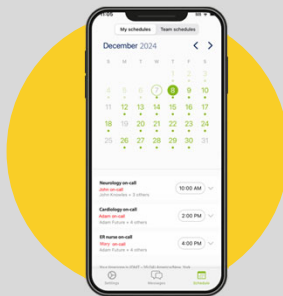

Dedicated Lines + Live Call Routing with Automation

Integration with EMR/EHR & Secure Chat Apps

Override DND and mute switch

View schedules on the go

Role-based messaging

Bridging Conversations, Connecting Care

Breaking Barriers for Providers to Seamlessly Connect with Other Clinicians and Patients.

Case Study

The Dragonfly House has adopted OnPage in its efforts to establish 24/7 mental health services for child victims of abuse and their non-offending family members. Prior to OnPage, the clinic provided services only during operational hours. With OnPage in place, the clinic has successfully implemented after-hours coverage, ensuring around-the-clock access to mental healthcare.

Case Study

When their physicians requested a more advanced alternative to pagers, Saint Francis Hospital turned to OnPage. Before OnPage physicians were frustrated with pager's limited capabilities. Now, Saint Francis Hospital enjoys a 100% reliability for hospital messages while relieving their physicians of carrying around an extra device.
