

OPAS-JARVIS Enterprise Authority System

User Guide

1. Overview

OPAS-JARVIS is an enterprise AI governance platform that provides an authority layer to control how autonomous AI agents execute decisions within enterprise environments.

2. Getting Started

- Access OPAS through your organization's provided endpoint
- Authenticate using your Microsoft Entra (Azure AD) credentials
- Navigate to the dashboard to view system status and policies

3. Core Functions

Authority Control:

- Define what AI systems are allowed to do

Execution Governance:

- Enforce policies before actions execute

Audit & Traceability:

- Monitor all AI decision logs

4. Workflow

AI Agent → OPAS → Policy Validation → Execution → Audit Log

5. Use Cases

- Financial transaction governance
- Enterprise workflow automation control
- AI compliance enforcement
