1.

Jumpstart Workshop

The Pilvipolku™ Jumpstart Workshop is a practical tool for understanding the key Cloud Adoption Framework concepts.

We begin with your vision. What are your objectives? The workshop identifies business goals and drivers behind the vision.

Based on your goals, we look at topics such as organizational readiness, adoption planning and possible gaps.

Turning goals in to actionable targets allows you to realize the full value of Azure adoption.

2. Discovery

What are your highest priority adoption goals? What motivates and drives them?

We create actionable and measurable outcomes from business drivers.

After the FastTrack Workshop, we'll deliver a Cloud Adoption Plan for your future use. Onrego is your partner every step of they way through the future stages.

DISCOVERY

3.

Gap analysis and development goals

Cloud adoption touches the whole organization. Pilvipolku™ provides tools for understanding strengths, existing skills and assigning organizational responsibility. These topics are covered in the workshop

For customers who have started with a cloud project with suboptimal results or with no follow-up, we'll conduct a gap analysis. We will benchmark your current landing zone and governance model.

Workshop, Plan and Gap Analysis

Jumpstart Cloud Adoption

Key deliverables and benefits

1. Understanding of the Cloud Adoption Framework
2. Cloud Adoption Plan –document
3. An overview of current organizational readiness and key drivers
4. Gap analysis of the current cloud environment and governance
