Brainstorm To Uncover High-Impact Of Copilot & Power Platform

Bring your business and IT teams together for interactive brainstorming sessions facilitated by OntargIT experts. These workshops are designed to identify automation, AI, and app development opportunities within your organization using Power Platform and Copilot Studio. Thus, businesses usually have time to focus only on key IT systems, missing the opportunities to implement new technologies such as Copilot or Power Platform within existing systems. That's where we can bring our knowledge and expertise to simplify your adaptation process.

Our consultants will guide participants through structured design-thinking exercises and idea validation to uncover high-impact use cases. Each session aims to generate practical insights — from quick wins in automation to strategic opportunities for Copilot integration.
By the end of the sessions, you'll have a clear list of prioritized ideas, potential business value, and a roadmap for turning concepts into reality with the Power Platform ecosystem.

Best Suited For:

- Business and IT leaders launching innovation or automation initiatives

- Cross-functional teams exploring how AI and Copilot can enhance processes

- Organizations looking to define a Power Platform business value

Why Choose OntargIT?

- Microsoft Solutions Partner with 15+ years of enterprise experience
- Certified Power Platform and Dynamics experts
- Deep industry expertise across manufacturing, distribution, and retail
- Flexible online delivery via Microsoft Teams with personalized guidance

Key Benefits:

1. Experience Power Platform value through a real prototype
2. Validate automation or **AI scenarios** before full implementation

3. Identify best-fit licensing and governance model
   Receive clear documentation with results, architecture, and recommendations
4. Option to scale PoC into full deployment

Frequently Asked Questions:

How many sessions are included?	Typically 2–3 online sessions, each 2–3 hours long.
What is the main deliverable?	A structured list of validated ideas and recommendations for next steps.
Can OntargIT help execute selected ideas?	Yes — we can develop Solution, Proof-of-Concept or training plan based on outcomes.
