

Business Empowerment with Microsoft Power Platform

Power Platform is a unified ecosystem of tools that transforms business tasks into automated solutions—conveniently and without deep programming knowledge.

Thanks to the Power Platform you can:

- create virtual agents using Copilot Studio,
- develop apps without extensive coding in Power Apps,
- automate tasks with Power Automate,
- model data in Dataverse,
- choose a convenient licensing option.

At the initiative of OntargIT, online training has been created to provide comprehensive knowledge and practical skills in mastering Power Platform.

Who is it for?

-  Business professionals who want to automate routine processes.
-  IT managers looking to optimize development processes and implement Low-code / No-code solutions.
-  IT administrators aiming to master Low-code / No-code and simplify management using platform. tools.

Training Program:

Power Apps

- overview of Microsoft Power Platform and introduction to Dataverse,
- creating a data model in Dataverse,
- introduction to PowerApps. Building Model-driven applications,

- automating processes with Power Automate Desktop,
- managing environments and administering Power Platform solutions.

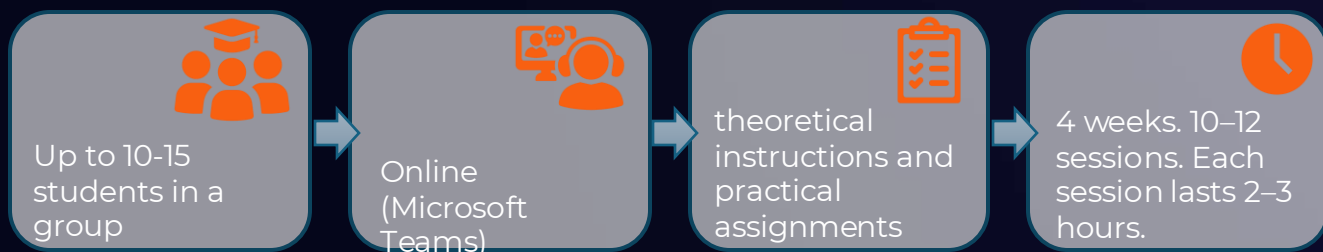

Copilot Studio

- Copilot Studio overview,
- creating virtual agents (basic features),
- adding Generative AI capabilities.

Licensing Essentials

- overview of Power Platform licensing options.

Format:

Why learn with OntargIT?

OntargIT is an international consulting company and Microsoft Gold Solutions Partner that has been transforming businesses for over 15+ years with Microsoft Dynamics 365 and Power Platform solutions.

What will you gain?

- + experienced consultants with Microsoft certifications,
- + adaptive training tailored to your organization's goals,
- + access to free Power Apps Developer Plan environments,
- + proven success with automated solutions in finance, supply chain, and customer engagement.

Program graduates will:

- understand what Power Platform is, its capabilities, and its purpose,
- build their own apps using PowerApps,
- automate business processes with Power Automate,
- develop virtual agents and bots in Copilot Studio,
- choose optimal licensing options for their company,
- experience firsthand how these tools can effectively optimize work.

Frequently Asked Questions:

Is training online or offline?

Training is conducted online via Microsoft Teams.

What is the duration of the training?

2–3 hours per day, 10–12 sessions over 4 weeks.

What tools are required for each participant?

A web browser, internet access, and an activated Power Apps Developer Plan. For Power Automate Desktop sessions, Power Automate Desktop must be installed, along with Microsoft Excel.

How many participants can be in a group?

We recommend up to 10 participants, but no more than 15 per day for quality interaction.

Are prior Power Platform skills required?

No, the training is suitable for beginners with no prior experience.

Do I need to purchase Microsoft Power Platform licenses to participate in the training?

No, participants get access through the free Power Apps Developer Plan, which includes all necessary features for learning.

Will there be a practical application of the knowledge?

Yes, our training includes both individual and group practical assignments to reinforce learning.
