- 3x Daily Application Backups
- And More

## There is more to Microsoft 365 than just licensing.

With over 40 apps included in most business licensing, you need a trusted advisor in your corner to set up, implement, maintain, and support a critical element of your business.

From backups and security to licensing and training, we have packages available to accommodate every organization's needs. Why go it alone, when for one low monthly price you have a certified team of experts in your corner.

*Each package includes up to 50 users. Additional users are \$3/\$7/\$12 per user per month depending on package. All users must have a Microsoft 365 license under our CSP program to be included. CSP license changes are additional and invoiced monthly (12 month commitment).*
