

# MICROSOFT POWER PAGES

## Your Low-Code Website Builder

Microsoft Power Pages is a secure, enterprise-grade, low-code software as a service (SaaS) platform for creating, hosting, and administering modern external-facing business websites. Whether you're a low-code maker or a professional developer, Power Pages empowers you to rapidly design, configure, and publish websites that work across web browsers and devices.

### Design Engaging Websites

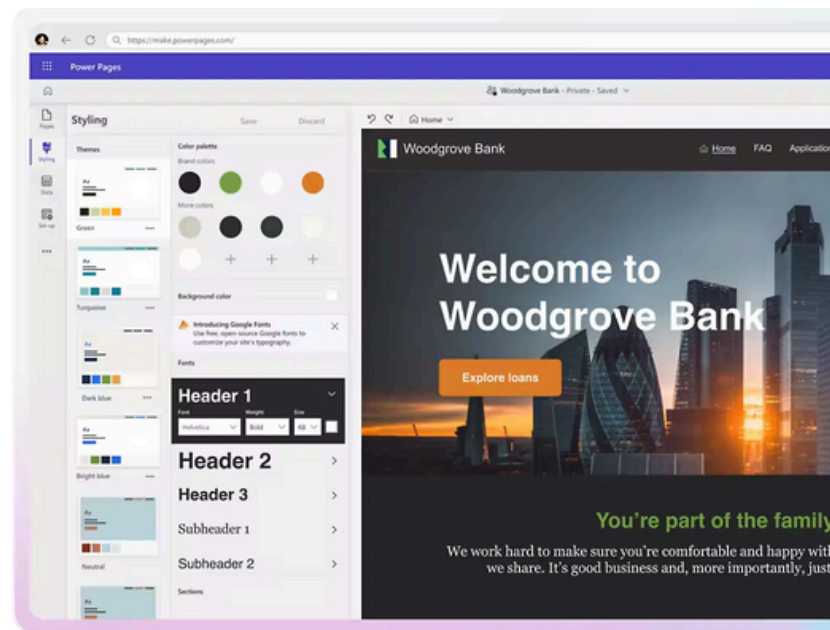

Get the ease of drag-and-drop design with no-code components including images, videos, lists, and forms.

### Get Up and Running Quickly

Start with a default template to quickly create websites for FAQ scheduling, registration, and application submission.

### Share Business Data

Manage your business data by storing it in Microsoft Dataverse and creating tables using the data workspace.

### Develop with Pro Tools

Add deeper functionality and capabilities to websites using tools such as Visual Studio Code, GitHub, and Azure DevOps.

### Strengthen Security

Mitigate security concerns through advanced encryption, rich role-based access controls, and support for web application firewalls.
