OPEEKA

P-CIS Evidences Health & Human Services Program Impact & Supports Better Outcomes

BENEFITS

- Create healthier service populations
- Evidence how policies & programs impact population health in real-time
- Reduce labor and burden of screening and assessment
- Save time & create efficiencies in workflow
- Allow workers to spend less time on data and more time with clients
- Adjust programs in real-time to help people and programs succeed
- Reduce and eliminate bias in decision processes

FEATURES

- Integrates seamlessly across a variety of electronic records
- Augments meaningful use of all types of screens and assessments
- Provides capability to complete screens/assessments via email/text/tablet
- Converts case information into outcomes metrics
- Tracks progress in care over time & alerts workers of change in care needs
- Recognizes population trends and helps workers respond to changes
- Supports real-time monitoring of individual and population outcomes

Program Evaluation Team accesses program participant outcome measures and reports on evidence of program impact on population health

P-CIS
OUTCOMES TRACKING & MONITORING

Microsoft

Any type of screen or assessment

Documents, activities and events are tracked

Monitor progress over time on outcome measures

Perform end of care assessments or case review of outcomes

Healthier Families!

Family Seeks Care

Health & Human Services

Worker Initiates Evaluation of Family Need and Fit for Programs

Worker enrolls individual/family in Program & creates a care plan

Worker tracks progress of individual/family throughout program & adjusts care as needed

Worker and/or individual/family identify that episode of care is complete and leaves care

Built on Microsoft
