Hybrid Benefits Calculator

Service description

All your compliance obligations in one place

Detect all the VMs: The tool retrieves all the VMs deployed on Azure

Hybrid Benefits vCPU calculation: The tool retrieves automatically the volume of hybrid benefits licenses of all VMs

SQL vCPU calculation: The tool retrieves automatically the volume of hybrid benefits licenses of all SQL services (VMs or Managed Services)

vCPU calculation

All the vCPU calculated with hybrid benefits

- Total of 2L licenses			
Total of on premise 2L licenses 112	Total of 2L licenses on Azure from VMs 504	Total of 2L licenses on Azure from SQL VMs 44	Total of 2L licenses from Managed SQL 20
- vCPU & 2L licenses to declare- Excluding South France, TST & VDI per subscription			
Total of core on Azure 452	Total of core on CGP-PRD-SUB 252	Total of core on CGL-PRD-SUB 58	Total of core on CG-Transit-SUB 142
Total of 2L licenses on Azure 504	Total of 2L licenses CGP-PRD-SUB 256	Total of 2L licenses CGL-PRD-SUB 68	Total of 2L licenses CG-Transit-SUB 180
Total of 2L licenses on Managed SQL 20	Total of 2L licenses Managed SQL CGP-PRD-SUB 12	Total of 2L licenses Managed SQL CGL-PRD-SUB 8	Total of 2L licenses Managed SQL CG-Transit-SUB 0

vCPU calculation for managed SQL

All the vCPU calculated from managed SQL instances
